INDEPENDENT AUDITOR'S REPORT

Chairman and Board of Commissioners  
Abbeville General Hospital  
Abbeville, Louisiana

We have audited the component unit financial statements of Abbeville General Hospital, a component unit of the Vermilion Parish Police Jury, State of Louisiana, as of December 31, 1988, and for the year then ended. These financial statements are the responsibility of the Hospital's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, based on our audit, the component unit financial statements referred to above present fairly, in all material respects, the financial position of Abbeville General Hospital, a component unit of the Vermilion Parish Police Jury, State of Louisiana, as December 31, 1988, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information included in Schedule I through III is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The financial information for the preceding year, which is indicated for comparative purposes only, was taken from the financial report for that year in which we expressed an unqualified opinion of the financial statements of Abbeville General Hospital.

  
Raymond A. Johnson

The accompanying notes are an integral part of these financial statements.

**ANNVILLE GENERAL HOSPITAL**

**NOTE TO FINANCIAL STATEMENTS**

**DECEMBER 31, 1988**

**NOTE 1. DESCRIPTION OF RECEIVING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Receiving Entity.** Annonville General Hospital (the Hospital) was created by the Vermilion Parish Police Jury to operate, control, and manage matters concerning the parish's health care functions. The Vermilion Parish Police Jury appoints the Board of Commissioners of the Hospital, and the Hospital may not incur debt without the Parish's approval. For this reason, the Hospital is considered to be a component unit of the Vermilion Parish Police Jury, State of Louisiana.

**Use of estimates.** The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

**Proprietary fund accounting.** The Hospital utilizes the proprietary fund method of accounting whereby revenues and expenses are recognized on the accrual basis. Substantially all revenues and expenses are subject to accrual.

**Inventories.** Inventories of drugs and supplies are stated at the lower of cost (first-in, first-out) or market.

**Property, Plant and Equipment.** Property and equipment acquisitions are recorded at cost. Depreciation is provided over the estimated useful life of each class of depreciable asset and is computed using the straight-line method. Equipment under capital lease obligations is amortized on the straight-line method over the shorter period of the lease term or the estimated useful life of the equipment. Such amortization is included in depreciation and amortization in the financial statements. Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

Gifts of long-lived assets such as land, buildings, or equipment are reported as unrestricted support, and are excluded from the account of restriction over expenses, unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that may be used to acquire long-lived assets are reported as restricted support. Amounts explicit donor stipulations should how long-lived assets must be maintained, requirements of donor restrictions are reported when the donated or acquired long-lived assets are placed in service.

**Costs of borrowing.** Expenses related to issuance of bonds are deferred and amortized over the life of the bonds.

**Cash and cash equivalents.** Cash and cash equivalents include investments in highly liquid debt instruments with an original maturity of three months or less.

**MERRILL LUMBER HOSPITAL****NOTE 2: FINANCIAL STATEMENTS****DECEMBER 31, 1988****NOTE 2: DESCRIPTION OF REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont.)**

**Advocare Loans.** The Hospital received approximately 4.1 percent in 1979 and 4.8 percent in 1978 of its financial support from Advocare Loans. These loans were used as follows:

	1979	1978
Percentage used for debt service on general obligations bonds	4.1%	4.8%

Interest thereon was received beginning in November of each year and became delinquent after January 31 of the following year.

**Risk Management.** The Hospital is exposed to various risks of loss from such things as theft of, damage to, and destruction of assets; business interruptions; errors and omissions; employee injuries and illnesses; natural disasters; and employee health, dental, and accident benefits. Commercial insurance coverage is purchased for claims arising from such matters. Settled claims have not exceeded this commercial coverage in any of the three preceding years.

**Investments in debt and equity securities.** Investments in debt and equity securities are carried at fair value except for investments in debt securities with maturities of less than one year at the time of purchase. These investments are reported at amortized cost, which approximates fair value. Interest, dividends, and gains and losses, both realized and unrealized, on investments in debt and equity securities are included in nonoperating income when earned.

**Net patient service revenue.** The Hospital has agreements with third-party payors that provide payments to the Hospital at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, retrospective costs, discounted charges, and net cost payments. Net patient service revenue is reported at the established and realizable amounts from patients, third-party payors, and others for services rendered, including medical malpractice adjustments under reimbursement agreements with third-party payors. Retrospective adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

**NOTE 3: MAJOR SOURCE OF REVENUE**

The Hospital participated in the Medicare and Medicaid programs as a provider of medical services to program beneficiaries. The Hospital derived approximately 46.9% and 47.9% of its gross patient service revenue in 1979 and 1978, respectively, from patients covered by the Medicare and Medicaid programs. Included in net patient service revenues for 1979 and 1978 is additional reimbursement for Medicaid disproportionate share adjustments of \$1,865,861 and \$145,476, respectively.

**NOTE 3: NET PATIENT SERVICE REVENUE**

The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows.

**AMERICAN GENERAL HOSPITAL**

**NOTES TO FINANCIAL STATEMENTS**

**DECEMBER 31, 1998**

**NOTE 2: NET PATIENT SERVICE REVENUE (CONT.)**

Medicare inpatient acute care services rendered to Medicaid program beneficiaries are paid at prospectively determined rates per discharge. These rates vary according to a patient classification system that is based on clinical diagnosis, length of stay factors, inpatient nursing services, certain outpatient services, and defined capital and medical collective costs related to Medicare beneficiaries and paid based on a cost reimbursement methodology. The Hospital is reimbursed for such reimbursable items at a tentative rate with final settlement determined after submission of annual cost reports to the Hospital and audits thereof by the Medicare fiscal intermediary. The Hospital's classification of patients under the Medicare program and the appropriateness of their admission are subject to an independent review by a peer review organization under contract with the Hospital. The Hospital's Medicare cost reports have been audited by the Medicare fiscal intermediary through December 31, 1998.

Medicaid inpatient and outpatient services rendered to Medicaid program beneficiaries are reimbursed under a cost reimbursement methodology, with certain limitations and exceptions. The Hospital is reimbursed at a tentative rate with final settlement determined after submission of annual cost reports filed by the Hospital and audits thereof by the Medicaid fiscal intermediary. The Hospital's Medicaid cost reports have been audited by the Medicaid fiscal intermediary through December 31, 1998. Effective July 1, 1998, the Medicaid inpatient reimbursement methodology switched to a prospective payment based on a fixed rate per day for medical and psychiatric patients.

The Hospital has also entered into payment agreements with certain commercial insurance carriers, and preferred provider organizations. The basis for payment to the Hospital under some of these agreements includes prospectively determined DRG rates.

**NOTE 4: PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment, by major category, is as follows at December 31, 1998 and 1997:

	Asset life in years	1998	1997
Land		\$ 251,800	\$ 233,000
Land improvements	10 - 20	290,200	232,440
Buildings	10 - 40	75,550,000	75,311,300
Furniture and equipment	15 - 20	2,580,000	2,500,000
Major medical equipment	5 - 10	12,350,700	11,552,000
Total cost		83,522,900	82,828,740
Less accumulated depreciation		(55,290,010)	(51,020,521)
Net Property, Plant and Equipment		\$ 28,232,890	\$ 31,808,219

ANNEXURE GENERAL FINANCIAL

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 1999

NOTE 5: LONG-TERM DEBT

Long-term debt at December 31, 1999 and 1998 consisted of the following:

	1999	1998
General obligation bonds, dated August 1, 1993, bearing an average interest rate of 6.553% maturing serially on May 1 of each year beginning in 1994, with interest payable on May 1 and November 1 of each year, with the final maturity of May 1, 2003	\$ 2,948,000	\$ 2,918,000
Hospital revenue bonds, dated February 1, 1992, bearing interest of 6.25% - 6.81, maturing serially on February 1 of each year beginning in 1993, with interest payable February 1 and August 1 of each year beginning in 1993, with the final maturity on February 1, 2018.	-	4,115,000
Hospital refunding bonds, dated February 1, 1995, bearing interest of 6.50%, maturing serially on February 1 of each year beginning in 2000, with interest payable February 1 and August 1 of each year beginning in 1999, with the final maturity on February 1, 2010.	5,675,000 8,975,000	-
Less unamort portion	900,000	840,000
Long-term portion	\$ 7,723,000	\$ 6,793,000

Under the terms of the Note Indentures, the Hospital is required to maintain certain deposits with a trustee. Such deposits are included with assets limited as to use in the financial statements.

Scheduled repayments on long-term debt are as follows:

	Principal	Interest	Total
2000	\$ 938,000	\$ 384,516	\$ 1,322,516
2001	1,045,000	321,333	1,366,333
2002	1,155,000	252,000	1,407,000
2003	1,170,000	205,100	1,375,100
2004	575,000	84,885	659,885
Thereafter	3,308,000	428,150	3,736,150
Total	\$8,091,000	\$1,755,914	\$ 9,846,914

NOTE 6: OPERATING LEASES

Total rental expense for 1999 and 1998 for all operating leases was \$161,108 and \$127,386, respectively.

KANSASVILLE GENERAL HOSPITAL

NOTE TO FINANCIAL STATEMENTS

December 31, 1999

**NOTE 7: PENSION PLAN**

The Hospital has established a non-contributory, defined contribution retirement plan funded through contributions to State Mutual Life Assurance Company of America. Any employee who on any entry date is within six (6) months of meeting the plan eligibility requirements will qualify. Plan eligibility is defined as three (3) years of service. Any employee, who is a member of a union and is covered by a collective bargaining agreement, under the terms which retirement benefits have been a subject of good faith bargaining, will not be eligible to participate in the plan. Any person who are contract workers and/or physicians shall not be considered employees for plan purposes and, therefore, will not be eligible to participate in the plan. Any employee who was a participant in the plan prior to the amendment and retirement will continue to remain a participant in the existing plan. Total payroll of employees covered by the plan for the year ended December 31, 1999, and 1998, was \$1,017,822 and \$4,618,476, respectively. Total payroll was \$18,348,135 and \$28,832,164 in 1999 and 1998, respectively.

The employer shall contribute for each plan year which the plan is in effect the amount which is actuarially determined to be necessary to fund the "assumed plan benefits" determined under the "individual premium funding method", assuming an interest rate of six (6) percent annually. Employer contributions are five (5) percent of covered payroll, and employees may contribute to the plan only with the consent of the employer. Payroll cost amounted to \$25,577 and \$26,952 in 1999, and 1998, respectively.

**NOTE 8: INVESTMENTS**

Assets limited as to use

The composition of assets limited as to use as December 31, 1999 and 1998, is set forth in the following table. Investments are stated at fair value.

	1999	1998
Investments designated for capital acquisition:		
Cash	\$ 365,700	\$ 1,248,813
U.S. Treasury obligations	5,417,813	6,818,423
Interest receivable	198,484	175,937
	<u>6,082,007</u>	<u>8,243,173</u>
Held by trustee under indenture agreement:		
U.S. Treasury obligation	2,288,582	1,754,129
Interest receivable	8,735	8,487
Property tax receivable	802,258	803,717
	<u>3,199,575</u>	<u>2,566,333</u>
Employer benefit fund held:		
Cash	94,125	212,182
	<u>\$ 6,375,707</u>	<u>\$ 11,234,815</u>

Investment income and gains on assets limited as to use, each separately, and other investments are comprised of the following for the years ending December 31, 1999 and 1998:

	1999	1998
Income:		
Interest income	\$ 623,874	\$ 652,087
Dividends and gains (loss) on investments	3,994	(71,808)
	<u>\$ 627,868</u>	<u>\$ 580,279</u>

AMBYLLAR GENERAL HOSPITAL

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 1988

NOTE 9: CASH FLOW SUPPLEMENTAL INFORMATION

Total interest paid by the Hospital was 1400,706 and 2613,614, for 1988 and 1987, respectively.

NOTE 10: BOND DEBT

On February 3, 1989, the Hospital issued 20, 625,000 in Revenue Bonds (including Bond Series 1989) with an interest rate of 4.75 in advance totaling \$5,185,000 of outstanding 1989 Revenue Bonds with an interest rate ranging between 5.5% - 6.0%. The net proceeds of \$3,589,395, after payment of \$15,455 in underwriting fees, insurance and other issuance cost plus an additional \$488,800 of 1989 sinking fund amounts were used to purchase U.S. government securities. These securities were deposited in an irrevocable trust with an escrow agent to provide for future debt service payments on the 1989 Revenue Bonds which mature on or after February 1, 2003.

As a result, the 1989 Revenue Bonds maturing on or after February 3, 1989, are considered to be delinquent and the liability for these bonds has been removed from long-term debt. Although the advance refunding resulted in the recognition of an accounting loss of \$145,874, for the year ended December 31, 1988, the Hospital in effect reduced its aggregate debt service payments by about \$907,887 over the next 10 years and obtained an economic gain (difference between the present value of the debt service payments on the old and new debt) of about \$743,988. The effective interest rate on the new issue is 3.9%.

NOTE 11: EMPLOYEE HOSPITALIZATION PLAN

The Hospital is currently enrolled in a self-insurance plan to provide health insurance to its employees. The Hospital makes monthly contributions to a fund used to cover expected expenses to be incurred by its employees. These monthly contributions are computed by an outside administrator who audits its processing claims. Included within the monthly contributions is an amount for health care insurance. This amount each insurance has a 245,000 deductible per employee, per year, which in effect, limits the Hospital's exposure to 245,000 per employee, per year. As of December 31, 1988, the Employee Benefit Fund assets were not sufficient to cover estimated liabilities. The Employee Benefit Fund carried a balance of \$24,625 while liabilities were estimated to be \$143,825. The Hospital's stop-loss policy will cover the shortage.

NOTE 12: CONCENTRATION OF CREDIT RISK

The Hospital grants credit without collateral to its patients, most of whom are local residents and are insured under third-party paper agreements. The mix of receivables from patients and third-party payers as December 31, 1988 and 1987 are as follows:

	1988	1987
Medicare	24%	24%
Medicaid	28	10
Commercial and other third-party payers	49	48
All other	17	18
	<u>100%</u>	<u>100%</u>

ANNVILLE GENERAL HOSPITAL

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 1999

NOTE 12: FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used by the Hospital in estimating the fair value of its financial instruments:

**Cash and cash equivalents:** The carrying amount reported in the balance sheet for cash and cash equivalents approximates its fair value.

**Receivables:** Fair values, which are the amounts reported in the balance sheet, are based on quoted market prices for similar securities.

**Assets limited as to use:** These assets consist primarily of cash and short-term investments and interest receivable. The carrying amount reported in the balance sheet is fair value.

**Accounts payable and accrued expenses:** The carrying amount reported in the balance sheet for accounts payable and accrued expenses approximates its fair value.

**Estimated third-party paper settlements:** The carrying amount reported in the balance sheet for estimated third-party paper settlements approximates its fair value.

**Long term debt:** Fair values of the Hospital's revenue bonds are based on current traded values. The fair value of the Hospital's remaining long-term debt is calculated using discounted cash flow analysis, based on the Hospital's current incremental borrowing rates for similar types of borrowing arrangements.

The carrying amounts and fair values of the Hospital's financial instruments at December 31, 1999 and 1998, are as follows:

	1999		1998	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	\$ 940,374	\$ 940,374	\$ 800,589	\$ 800,589
Assets limited as to use	13,809,938	13,809,938	14,704,879	14,704,879
Accounts payable and accrued expenses	1,546,468	1,546,468	574,540	574,540
Estimated third-party paper settlements	1,336,708	1,336,708	1,908,571	1,908,571
Long term debt	7,300,000	7,815,000	8,800,000	8,070,000

ANNVILLE GENERAL HOSPITAL

NOTE TO FINANCIAL STATEMENTS

DECEMBER 31, 1998

NOTE 14: DEBT SECURITIES AND INVESTMENTS

Securities purchased by the Hospital to invest in obligations of the U.S. Treasury, agencies, and instrumentalities, commercial paper rated A-1 by Standard & Poor's Corporation or P-1 by Moody's Commercial Paper Service, bankers' acceptances. At December 31, 1998 and 1998, the Hospital had bank balances as follows:

	1998	1998
U.S. Treasury Obligations	\$ 538,980	\$ 537,200
Collateralized by securities held by the following financial institutions		
Trust department in the Hospital's name	1,038,130	889,264
Total	<u>\$1,577,110</u>	<u>\$1,426,464</u>
Carried value	<u>\$ 888,584</u>	<u>\$1,008,200</u>

As discussed in Note 1, the Hospital's investments generally are carried at fair value. All securities are held in the Hospital's name by a custodial bank that is the agent of the Hospital. At December 31, 1998 and 1998, the Hospital's investments consisted of the following:

	1998	1998
U.S. Treasury obligations	<u>\$5,871,285</u>	<u>\$8,562,181</u>

**REPORT ON INTERNAL CONTROL STRUCTURE & COMPLIANCE  
WITH LAWS AND REGULATIONS**

Chairman and Board of COMMISSIONERS  
Missouri General Hospital  
Missouri, Louisiana

**INTERNAL CONTROL STRUCTURE**

We have audited the general-purpose financial statements of Missouri General Hospital, a component unit of the Vermilion Parish Police Jury, State of Louisiana, as of and for the year ended December 31, 1979, and have issued our report thereon dated May 8, 1980.

We conducted our audit in accordance with generally accepted auditing standards and Comptroller Auditing Standards, issued by the Comptroller General of the United States. These standards require that we plan and perform the audit to obtain a reasonable assurance about whether the general-purpose financial statements are free of material misstatement.

The management of Missouri General Hospital is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, reliance and judgment by management are required to assess the expected benefits and related cost of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are recorded in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles. Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

In planning and performing our audit of the general-purpose financial statements of Missouri General Hospital for the year ended December 31, 1979, we obtained an understanding of the internal control structure. With respect to the internal control structure, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation, and we assessed control risk in order to determine our auditing procedures for the purpose of expressing our opinion on the general-purpose financial statements and not to provide an opinion on the internal control structure. Accordingly, we do not express such an opinion.

our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in accounts that would be material in relation to the general purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control structure and its operations that we consider to be material weaknesses as defined above.

#### **COMPLIANCE WITH LAWS AND REGULATIONS**

Compliance with laws, regulations, contracts, and grants applicable to Abbeville General Hospital, is the responsibility of Abbeville General Hospital's management. As part of obtaining reasonable assurance about whether the financial statements are free of material misstatements, we performed tests of the Abbeville General Hospital's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our audit of the general purpose financial statements was not to provide an opinion on the overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance that are required to be reported herein under Government Auditing Standards.

#### **OTHER MATTERS**

During our audit we identified several other matters that represented improvements in internal controls and operating efficiencies. The following summarizes our comments regarding this matter.

#### **AGE OF MEDICARE RECEIVABLES DEBITABLE**

##### **Findings and Observations:**

Receivables receivable for Medicaid/Medicare Patients totaled \$286,458 as of December 31, 1999, compared to \$285,841 as of December 31, 1998. This is an increase of 35%. Based on final discharge dates, approximately 81% of the receivable balance is at least 9 months old.

##### **Conclusions and Recommendations:**

The results of our work did not indicate any specific causes for this, however, the processes utilized to obtain confirmation of coverage may need to be reviewed.

**DISTRIBUTION OF ACCOUNTS PAYABLE CHECKS**

**Findings and Observations:**

It was noted that the accounts payable clerk receives and then mails checks to vendors after they have been signed. The person responsible for preparing the accounts payable checks should not have control over those checks once they have been signed. This would reduce the possibility of the accounts payable clerk altering checks after they have been signed.

**Conclusions and Recommendations:**

We have been informed by management that someone other than the accounts payable clerk is now handling the mailing of the checks. We have not tested this control.

This report is intended for the information of the Asheville Memorial Hospital, townships, and business legislative auditor. However, this report is a matter of public record, and its distribution is not limited.

We acknowledge with appreciation the courtesies extended our representatives during the audit.

Sincerely,

**JOHN DAVIS**  
Certified Public Accountant

State of Louisiana  
P.O. Box 94297  
Baton Rouge, Louisiana 70804-0297

**RE: 12-21-99 Audit Management Letter**

Dear Mr. Kyle:

In regard to the above, please review the detailed action plans management has taken to provide improvement in the following areas:

**1. Age of Medicaid Psychiatric Receivables**

The Utilization Review Committee will continue to monitor data regarding Medicaid Psychiatric patient days (See related graphs). The hospital has been in contact with the State regarding the financing of patient care related to judicially committed patients awaiting State placement (See letter dated March 1, 2000). In addition, the hospital is in the process of converting the unit to a geriatric psychiatric unit (Medicaid Unit).

**2. Distribution of Accounts Payable Checks**

As indicated in the report, management has addressed this by assigning the activity to the payroll desk.

Sincerely,

Ray Landry  
Chief Executive Officer

March 1, 2000

The Honorable Fred Hoyt  
State Senator  
Vermilion Parish Courthouse Bldg.  
100 N. State Street, Suite 150  
Abbeville, Louisiana 70510

Dear Senator Hoyt:

This correspondence is to request your assistance in a matter of great concern to our hospital.

One of the focal points of our 1998 financial audit was an increase of approximately 108% in accounts receivable for Medicaid psychiatric patients when compared to 1997. At completion of the audit, the Medical Director of Psychiatric Services and the Utilization Review Team were directed to conduct a complete process analysis to determine the root cause of non-covered Medicaid days and to develop an action plan to reduce those days. We are under obligation to report both the audit report and the subsequent findings relating to coverage of Medicaid psychiatric days to the Louisiana Legislative Auditor.

Review of the total non-covered psychiatric Medicaid days for 1998 revealed that 72% of those days resulted from judicial commitment situations, i.e., were days involving patients awaiting placement in a state psychiatric hospital. Further review of those non-covered days in 1999 revealed 67% were attributable to this same situation, judicial commitment. Enclosed with the letter is an illustration of the magnitude of this portion of non-covered Medicaid days for both years. Thus we come to the intent of my correspondence to you, two issues we are faced with which impact greatly our financial picture.

The first issue is availability of state facility beds for patients mandated for placement in such a facility. We have in some cases waited in excess of 30 days following the signing of the judgment for a state bed to become available. The state system is apparently unable to accommodate the bulk of patients for placement due to inadequate beds. Two causes stated to us of this inadequacy are first, the increasingly high forensic census in state facilities and second, directives from the state to keep censuses down in state facilities. Whatever the cause of the inadequacy, this obviously negatively affects our length of stay since these patients cannot simply be discharged from our facility back into the community. Which brings me to the second issue, reimbursement for these excessive lengths of stay.

March 1, 2000  
The Honorable Fred Hoyt  
Page 2

In every case of judicial commitment of a Medicaid patient, we have been left with non-covered ("non-paid") continued stay days. The reason for this, as stated to us by a representative of Unibys, the pre-certification body for Medicaid, is that at the time of the signing of the judgment, the state becomes the custodian of the patient and the patient is no longer eligible for Medicaid. What this means to us, in simple language, is we are compelled to hold and care for a patient until that patient can be placed in a state facility with no payment for the care and services provided to that patient, be it for one week or one month. Our contention is, were the patient placed in a state facility at the time of commitment that state facility would be reimbursed for that patient's care. Since we are providing this care in lieu of the state facility, why are we not considered for reimbursement, at minimum, at a lesser rate?

In conclusion, I would respectfully request that you, in your legislative capacity, consider these issues and the impact they have on Abbeville General Hospital, and to the extent you feel capable, assist us in alleviating the burden placed on us by this situation.

Thank you for your attention.

Sincerely,

Ray Landry  
Chief Executive Officer
