Independent Auditors' Report

To the Honorable Mayor and Board of Aldermen
Town of Ball, Louisiana

REPORT ON THE FINANCIAL STATEMENTS

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the Town of Ball, as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Town of Ball, as of June 30, 2022, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Town of Ball and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town of Ball's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Town of Ball's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town of Ball's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require the information listed below to supplement the basic financial statements.

- Management's Discussion and Analysis
- Budgetary Comparison Information
- Schedule of Net Pension Liability Data
- Schedule of Employer Contributions

Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for

consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town of Ball's basic financial statements. The Schedule of Compensation, Benefits and Other Payments to the Agency Head or Chief Executive Officer, the Schedule of Per Diem Paid to Board Members, and the Justice System Funding Schedule, described as additional information in the accompanying table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The additional information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the additional information is fairly stated in all material respects in relation to the basic financial statements as a whole.

OTHER REPORTING REQUIRED BY GOVERNMENT AUDITING STANDARD

In accordance with *Government Auditing Standards*, we have also issued our report dated December 21, 2022, on our consideration of the Town of Ball's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an engagement in accordance with *Government Auditing Standards* in considering the Town of Ball's internal control over financial reporting and compliance.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON
COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Honorable Mayor and Board of Aldermen
Town of Ball, Louisiana

We were engaged to audit, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, and each major fund of the Town of Ball, as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements, and have issued our report thereon dated December 21, 2022.

INTERNAL CONTROL OVER FINANCIAL REPORTING

In connection with our engagement to audit the financial statements, we considered the Town's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, we do not express an opinion on the effectiveness of the Town's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did not identify any deficiencies in internal control that we consider to be material weaknesses.

COMPLIANCE AND OTHER MATTERS

In connection with our engagement to audit the Town of Ball's financial statements, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our engagement, and accordingly, we do not express such an opinion. The results of our tests did not disclose any instances of noncompliance that were required to be reported under *Government Auditing Standards*.

PURPOSE OF THIS REPORT

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

MANAGEMENT'S DISCUSSION AND ANALYSIS

June 30, 2022

This section of the Town of Ball's annual financial report presents our discussion and analysis of the Town's financial performance during the year ended June 30, 2022.

OVERVIEW OF FINANCIAL STATEMENTS

The basic financial statements include government-wide financial statements and fund financial statements. These two types of financial statements present the Town's financial position and results of operations from differing perspectives which are described as follows:

Government –Wide Financial Statements

The government-wide financial statements report information about the Town as a whole using accounting methods similar to those used by private-sector companies. These report all revenues and expenses regardless of when cash is received or paid. Furthermore, the government-wide statements include all of the Town's assets (including infrastructure acquired after January 1, 2004 and all of the Town's liabilities (including long-term debt).

The government-wide financial statements are divided into two categories, which are described as follows:

- **Governmental Activities** – Expenses incurred in connection with providing basic services including public safety, recreation, public works and general administration are reported as governmental activities. The governmental activities are financed by taxes, license and permit fees, fines and forfeitures, and intergovernmental sources.
- **Business-Type Activities** – Expenses associated with providing sanitation and utility services are recovered through fees paid by the customers that utilize these services. These activities are operated in a manner similar to commercial enterprises. Accordingly, activities associated with these services are reported as business type activities.

Fund Financial Statements

Fund financial statements provide detailed information regarding the Town's most significant activities and are not intended to provide information for the Town as a whole. Funds are accounting devices that are used to account for specific sources of funds. The Town has two types of funds that are described as follows:

- **Governmental Funds** – These funds are used to account for essentially the same functions that are reported as governmental activities in the government-wide financial statements. However, unlike government-wide financial statements, the governmental funds use a modified accrual basis of accounting that provides a short-term view of the Town's finances. Assets reported by governmental funds are limited to amounts that are available for current needs. In addition, liabilities are limited to amounts that are expected to be paid from currently available assets.
- **Proprietary Funds** – These funds are used to account for activities that function in a manner similar to commercial enterprises, including activities associated with the Town's utility services. Proprietary fund financial statements typically provide a more detail presentation of the information reported in the business-type activities portion of the government-wide financial statements.

FINANCIAL ANALYSIS OF THE TOWN AS A WHOLE

A comparative analysis of government-wide financial data is presented as follows:

Net Position

A condensed version of the government-wide Statement of Net Position is presented as follows:

As the presentation appearing above demonstrates, the largest portion of the Town's net position is invested in capital assets. Net position invested in capital assets consists of land, buildings, equipment, and infrastructure less any debt used to acquire the assets that remain outstanding. The Town uses these capital assets to provide services to its citizens; consequently, these amounts are not available for future spending.

Remaining resources are subject to restrictions that are imposed by agreements with various revenue sources.

Recognizing long-term liabilities associated with participation in cost sharing defined benefit retirement programs has eliminated the Town's remaining net position. Despite the absence of net position, the Town has sufficient resources to meet these obligations for the foreseeable future.

MANAGEMENT'S DISCUSSION AND ANALYSIS

June 30, 2022

FINANCIAL ANALYSIS OF THE TOWN'S FUNDS

An analysis of significant matters affecting the Town's funds is presented as follows:

- The Town's governmental fund reported a fund balance of \$1,116,378, which represents an increase of \$7,393.
- Amounts reported for business-type activities in the Town's individual funds are identical to the business-type activities reported in the government-wide presentation.

GENERAL FUND BUDGET HIGHLIGHTS

Budgets were amended in order to address matters that were not anticipated when the original budget was adopted.

CAPITAL ASSET ADMINISTRATION

Significant capital asset activity for the year ended June 30, 2022 was limited to the purchase of a new vehicle, various equipment purchases for the Sanitation Department, and equipment upgrades for the Sewer System.

DEBT ADMINISTRATION

Debt activity included the Town issuing new Sewer Revenue Bonds, totaling \$1,200,000, and paying amounts contractually due on existing debt.

FACTORS EXPECTED TO AFFECT FUTURE OPERATIONS

At the present time, management is not aware of any factors expected to have a significant impact on future operations.

Town of Ball

Notes To Financial Statements

June 30, 2022

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Town of Ball (the Town) was incorporated under the provisions of the Lawrason Act. The Town is governed by a Mayor and a Board of Aldermen consisting of five (5) members. Services provided by the Town include police protection, fire protection, and street maintenance. The Town also operates a sanitation service and a sewer system that are supported by user charges.

The accompanying policies conform to generally accepted accounting principles for governmental units.

Financial Reporting Entity

As the municipal governing authority, for reporting purposes, the Town is considered a separate financial reporting entity. The financial reporting entity consists of (a) the primary government (the Town), (b) organizations for which the primary government is financially accountable, and (c) other organizations for which nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Governmental Accounting Standards establish criteria for determining which component units should be considered part of the Town of Ball for financial reporting purposes. The criteria to be considered are presented as follows:

1. Appointing a voting majority of an organization's governing body, and
 - a) The ability of the Town to impose its will on that organization and/or
 - b) The potential for the organization to provide specific financial benefits to or impose specific financial burdens on the Town.
2. Organizations for which the Town does not appoint a voting majority but are fiscally dependent on the Town.
3. Organizations for which the reporting entity financial statements would be misleading if data of the organization is not included because of the nature or significance of the relationship.

Based on these criteria the presented above, the only potential component unit is the Town's Volunteer Fire Commission. However, based on further consideration, it was determined that the Commission serves in an advisory capacity and does not have sufficient decision-making authority to be considered a component unit.

Basic Financial Statements

The basic financial statements include both government-wide and fund financial statements. Both government-wide and fund financial statements categorize activities as either governmental activities or business-type activities, which are described as follows:

- Governmental activities involve government services that are normally supported by taxes and intergovernmental revenues.
- Business-type activities rely on fees and charges for support and operate in a manner similar to private sector enterprises.

The government-wide and fund financial statements present the Town's financial position and results of operations from differing perspectives which are described as follows:

Town of Ball

Notes To Financial Statements

June 30, 2022

Government-Wide Financial Statements

The Statement of Net Position and the Statement of Activities display information about the Town as a whole. The effect of most interfund activity is eliminated from these financial statements. Furthermore, government-wide financial statements exclude fiduciary activities which are reported in the fund financial statements.

Program revenues reported in the Statement of Activities consist of amounts that are directly associated with a governmental service or business-type activity. Program revenues include charges for services, fines, court cost, contributions associated with a particular function and most grants.

Fund Financial Statements

Funds are separate accounting entities that are designed to assist with demonstrating legal compliance and segregating transactions by activity. Separate financial statements are provided for governmental funds and business-type (enterprise) funds. In addition, separate financial statements are presented for any fiduciary activities. Major individual funds are reported as separate columns in the fund financial statements. The Town's major funds are described as follows:

Major Governmental Funds

General Fund – The general fund is the primary operating fund. It is used to account for all financial resources except those required to be accounted for in another fund.

Major Business-Type Funds

Sanitation Service – Used to account for transactions associated with collecting and disposing of solid waste.

Sewer System – Used to account for sewer collection and treatment, which is supported by user charges.

Business-Type funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing goods and services in connection with the funds ongoing operations. Principal operating revenues are charges to customers for sanitation and sewer service.

Basis of Accounting and Measurement Focus

Basis of accounting refers to when revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the measurement focus applied. The basis of accounting and measurement focus used for various financial statement presentations are described as follows:

| <u>Financial Statement Presentation</u> | <u>Basis of Accounting</u> | <u>Measurement Focus</u> |
|--|-----------------------------------|---------------------------------|
| Government-Wide Financial Statements | Accrual Basis | Economic Resources |
| Fund Financial Statements: | | |
| Governmental Funds | Modified Accrual Basis | Current Financial Resources |
| Proprietary Funds | Accrual Basis | Economic Resources |
| Fiduciary Funds | Accrual Basis | Economic Resources |

Under the accrual basis of accounting and the economic resources measurement focus, revenues are recorded when earned and expenses are recorded when a liability is incurred.

Under the modified accrual basis of accounting and the current financial resources measure focus revenue is recognized when it is considered measurable and available. Revenue is considered available if it is collected within 60 days of year end or due under a cost reimbursement arrangement. In addition, expenses are generally recorded when a liability has been incurred; however, debt service, compensated absences, claims and judgments are recorded as expenses when payment is made. Furthermore, when the current financial resources measurement focus is used, amounts recorded as assets exclude

Town of Ball

Notes To Financial Statements

June 30, 2022

capital assets and the acquisition of capital assets is treated as an expenditure. In addition, long-term debts are excluded from amounts reported as liabilities. Proceeds from issuing long-term debt is reported as other financing sources and repayment of long-term debt is reported as an expenditure.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Restricted Assets:

Restricted assets represent resources that must be expended in a specific manner. Restrictions of this nature are imposed by various contractual obligations including grant agreements and bond covenants. Whenever restricted assets can be used to satisfy an obligation, the restricted assets are typically consumed before utilizing any unrestricted resources.

Budget Practices:

Budgets including any amendments are prepared in the manner prescribed by Louisiana revised statutes. Town budgets present revenue and expenditures on a basis which is consistent with generally accepted accounting principles. Budgets are adopted annually for the general fund and each special revenue fund. The remaining funds are not required to adopt budgets.

Capital Assets

Capital assets, which include property, equipment and infrastructure, are reported as assets in the applicable governmental or business-type columns in the government-wide financial statements and in the fund financial statements for proprietary funds. Assets reported in the fund financial statements for governmental funds exclude capital assets. Instead, the governmental funds report the acquisition of capital assets as expenditures rather than asset acquisitions.

All capital assets are valued at historical cost or estimated historical cost if actual historical cost is not available. Donated assets are valued at their fair market value when received by the Town. Capital assets are depreciated using the straight-line method and estimated useful lives ranging from 4 to 50 years. Useful lives are selected depending on the expected durability of the particular asset.

Cash and Cash Equivalents:

Amounts reported as cash and cash equivalents (restricted and unrestricted) include all cash on hand, cash in bank accounts, certificates of deposit and highly liquid investments. Credit risk associated with bank deposits is limited by requiring fiscal agent banks to pledge securities as required by State Law. Furthermore, interest rate risk associated with certificates of deposits is typically mitigated by purchasing instruments that mature in one year or less.

Internal Activity:

Resources belonging to particular funds are commonly shared with other funds that need access to additional resources. When resources are provided without expectation of repayment, the transaction is reported as a transfer. Transfers are treated as a source of income by the recipient and as an expense or expenditure by the provider. If repayment is eventually expected to occur, interfund receivables and payables are recorded.

In preparing the government-wide financial statements, transfers are eliminated to present net transfers for governmental activities and business-type activities. In addition, interfund receivables and payables are eliminated to present a net internal balance for each type of activity.

NOTE 2 - CASH AND CASH EQUIVALENTS

At June 30, 2022, cash and cash equivalents included the following amounts:

| | Governmental Activities | Business-Type Activities | Total |
|---------------------------|------------------------------------|-------------------------------------|---------------------|
| Cash Deposited in Banks | \$ 1,844,720 | \$ 2,057,744 | \$ 3,902,464 |
| Cash on Hand | 300 | ---- | 300 |
| | | | |
| Cash and Cash Equivalents | <u>\$ 1,845,020</u> | <u>\$ 2,057,744</u> | <u>\$ 3,902,764</u> |

Cash deposited in banks is stated at cost, which approximates market. Under state law, these deposits must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit with the fiscal agent. These securities are held in the name of the pledging fiscal agent bank in a holding or custodial bank that is mutually acceptable to both parties. Even though the pledged securities are considered uncollateralized, state law imposes a statutory requirement on the custodial bank to advertise and sell the pledged securities within 10 days of being notified that the fiscal agent has failed to pay deposited funds upon demand. At June 30, 2022, the Town's deposits were secured by \$683,264 of federal deposit insurance, and \$3,954,712 in pledged securities held by the custodial bank in the name of the fiscal agent bank.

NOTE 8 – TAXES

Ad Valorem Taxes:

The Town bills and collects its own property taxes using the assessed values determined by the Tax Assessor of Rapides Parish. Property taxes are limited to an assessment for general alimony as permitted by State Law. Ad valorem taxes are assessed on a calendar year basis and are due on or before December 31 in the year the tax is levied. Revenues from ad valorem taxes are recognized as revenue in the year billed by the Town's General Fund.

Sales Taxes:

Citizens of the Town have permanently approved a 1.5% sales tax and a 0.5% sales tax. The sales taxes are collected by the Parish of Rapides and remitted to the Town on a monthly basis. The sales taxes are deposited in the Town's general fund and allocated to departments as required by dedications imposed by the sales tax propositions. These dedications are summarized as follows:

| | |
|---|-----------------------|
| Fire Department | 28.75% |
| Police Department | 26.67% |
| Streets, Recreation and Community Centers | 37.08% |
| General Administration | 3.75% |
| Public Works and Facilities | 3.75% |
| Total | <u>100.00%</u> |

Town of Ball

Notes To Financial Statements June 30, 2022

The Town is also entitled to receive a portion of a parish-wide sales tax that is shared with other government agencies. The proceeds of this tax are unrestricted. Accordingly, the tax is deposited in the general fund and expended at the Town's discretion.

In addition, the Town receives an allocation from a 0.5% sales tax approved by the voters of Sales Tax District No. 3. The tax is available for general operations.

NOTE 9- RISK MANAGEMENT

The Town is exposed to various risk of loss related to torts; theft, damage or destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Town insures against these risks by participation in public entity risk pools that operate as common insurance programs and by purchasing commercial insurance.

NOTE 10 – RESTRICTED RESOURCES

As discussed in Note 8, portions of the sales taxes collected by the Town are dedicated to specific purposes. Proceeds from these sales taxes are reported as restricted until expended for purposes that are consistent with sales tax propositions.

NOTE 11 – PENSION PLANS:

Substantially all Town employees are members of statewide retirement systems. These systems are cost-sharing, multiple-employer defined benefit pension plans administered by separate boards of trustees. A summary of amounts reported in connection with participation in these plans is summarized as follows:

| | <u>Net Pension Liability</u> | <u>Deferred Outflows of Resources</u> | <u>Deferred Inflows of Resources</u> |

| Portion Applicable to Government Type Activities | <u>\$ 1,168,436</u> | <u>\$ 472,886</u> | <u>\$ 590,500</u> |

Further information regarding each of the retirement systems presented above is furnished as follows:

Municipal Employees' Retirement System of Louisiana:

Plan Description - The System is composed of two distinct plans, Plan A and Plan B, with separate assets and benefit provisions. All employees of the municipality are members of Plan A. All permanent employees working at least 35 hours per week who are not covered by another pension plan and are paid wholly or in part from municipal funds and all elected municipal officials are eligible to participate in the System. Any member of Plan A who commenced participation in the System prior to January 1, 2013 can retire providing he or she meets one of the following criteria:

- Any age with twenty-five (25) or more years of creditable service.
- At age 60 with a minimum of ten (10) years of creditable service.

Town of Ball

Notes To Financial Statements

June 30, 2022

- At any age with 20 years of creditable service, exclusive of military service with an actuarially reduced early benefit.

Any member of Plan A who commenced participation in the system after January 1, 2013 can retire providing, he or she meets one of the following criteria:

- At age 67 with seven (7) years of creditable service.
- At age 62 with ten (10) years of creditable service.
- At age 55 with thirty (30) years of creditable service
- At any age with twenty-five (25) years of creditable service with an actuarially reduced early benefit.

Generally, the monthly amount of the retirement allowance for any member of Plan A shall consist of an amount equal to 3% of their final-average salary for each year of creditable service multiplied by his or her years of creditable service. Final-average salary is the employee's average salary over the 36 consecutive or joined months that produce the highest average. Employees who terminate with at least the amount of creditable service stated above, and do not withdraw their employee contributions, may retire at the ages specified above and receive the benefit accrued to their date of termination. The System also provides death and disability benefits. Benefits are established or amended by state statute.

Funding Policy - Under Plan A, members are required by state statute to contribute 9.50% of their annual covered salary and the Town is required to contribute at an actuarially determined rate. Contributions to the System also include one-fourth of 1% (except Orleans and East Baton Rouge parishes) of the taxes shown to be collectible by the tax rolls of each parish. These tax dollars are divided between Plan A and Plan B based proportionately on the salaries of the active members of each plan. The contribution requirements of plan members and the Town are established and may be amended by state statute. As provided by R.S. 11:103, the employer contributions are determined by actuarial valuation and are subject to change each year based on the results of the valuation for the prior fiscal year. The Town's contributions to the system were equal to the required contributions for each of the past three years.

Financial Summary – The plan description, funding policies and financial information provides a summary of the Plan provisions and finances. For additional details, the System issues an annual publicly available stand-alone financial report. The financial report includes information about the plan's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and fiduciary net position. The report can be obtained on the internet at mersla.com. The plans net pension liability was determined at June 30, 2021 (measurement date and actuarial valuation date) and details are provided as follows:

| | |
|---|--------------------|
| Total Pension Liability | \$ 1,253,886,002 |

Town of Ball

Notes To Financial Statements June 30, 2022

| | |
|----------------------------|--|
| Actuarial Assumptions: | |
| Investment Rate of Return | 6.85%, net of investment expense, including inflation |
| Projected Salary Increases | 6.4% Plan A (1-4 Years of service) 4.5% Plan A (4+ Years of service) |
| Mortality Rates | <p>Annuitant and Beneficiary - PubG-2010(B) Healthy Retiree Table set equal to 120% for males and females, each adjusted using their respective male and female MP2018 scales.</p> <p>Employee Mortality - PubG-2010(B) Employee Table set equal to 120% for males and females, each adjusted using their respective male and female MP2018 scales</p> <p>Disabled Lives – PubNS-2010(B) Disabled Retiree Table set equal to 120% for males and females with the full generational MP 2018 scale</p> |

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation of 2.6% and an adjustment for the effect of rebalancing/diversification. The resulting expected long-term rate of return was 6.95% for the year ended June 30, 2021.

Best estimates of arithmetic real rates of return for each major asset class included in the System’s target asset allocation as of June 30, 2021 are summarized in the following table:

| <u>Asset Class</u> | <u>Target Asset Allocation</u> | <u>Long-Term Expected Portfolio Real Rate of Return</u> |
|------------------------------------|--------------------------------|---|
| Public Equity | 53% | 2.31% |
| Public Fixed Income | 38% | 1.65% |
| Alternatives | 9% | 0.39% |
| Totals | 100% | 4.35% |
| Inflation | | 2.60% |
| Expected Arithmetic Nominal Return | | 6.95% |

The discount rate used to measure the total pension liability was 6.85%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from participating employers will be made at the actuarially determined rates, which are calculated in accordance with relevant statutes and approved by the Board of Trustees and the Public Retirement Systems’ Actuarial Committee. Based on those assumptions, the System’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The effects of certain other changes in the net pension liability are required to be included in pension expense over the current and future periods. The effects on the total pension liability of (1) changes of economic and demographic assumptions or of other inputs and (2) differences between expected and actual experience are required to be included in pension expense in a systematic and rational manner over a closed period equal to the average of the expected remaining service lives of all employees that are provided with benefits through the pension plan (active employees and inactive

employees), determined as of the beginning of the measurement period. The effect on net pension liability of differences between the projected earnings on pension plan investments and actual experience with regard to those earnings is required to be included in pension expense in a systematic and rational manner over a closed period of five years, beginning with the current period.

Sensitivity to changes in the discount has been determined by measuring net pension liability at a discount rate that is one percentage point lower and one percentage point higher than the current rate (assuming all other assumptions remain unchanged). The results are presented as follows:

| | 1% Decrease 5.85% Discount Rate | Current Discount Rate 6.85% | 1% Increase 7.85 % Discount |
|-----------------------|------------------------------------|--------------------------------|--------------------------------|
| Net Pension Liability | \$ 1,332,278 | \$ 899,550 | \$ 534,050 |

Firefighters' Retirement System of Louisiana

Plan Description – Membership in the Louisiana Firefighters' Retirement System is mandatory for all full-time firefighters employed by a municipality, parish or fire protection district that did not enact an ordinance before January 1, 1980, exempting itself from participation in the System. Employees are eligible to retire at or after age 55 with at least 12 years of creditable service or at or after age 50 with at least 20 years of creditable service. Upon retirement, members are entitled to a retirement benefit, payable monthly for life, equal to 3^{1/3} percent of their final-average salary for each year of creditable service, not to exceed 100 percent of their final-average salary. Final-average salary is the employee's average salary over the 36 consecutive or joined months that produce the highest average. Employees who terminate with at least 12 years of service and do not withdraw their employee contributions may retire at or after age 55 (or at or after age 50 with at least 20 years of creditable service at termination) and receive the benefit accrued to their date of termination. The system also provides death and disability benefits. Benefits are established or amended by state statute.

Funding Policy – Plan members are required by state statute to contribute 10.0 percent of their annual covered salary and the Town is required to contribute at an actuarially determined rate. The contribution requirements of plan members and the Town are established and may be amended by state statute. As proved by state law, the employer contributions are determined by actuarial valuation and are subject to change each year based on the results of the valuation for the prior fiscal year. The Town's contributions to the plan were equal to the required contributions for each of the past three years.

Financial Summary – The plan description, funding policies and financial information provides a summary of the Plan provisions and finances. For additional details, the System issues an annual publicly available stand-alone financial report. The financial report includes information about the plan's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and fiduciary net position. | Cost of Living Adjustments | Only those previously granted |

The estimated long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The long term expected nominal rate of return was 6.90 % as of June 30, 2021.

Best estimates of real rates of return for each major asset class included in FRS' target asset allocation as of June 30, 2021 are summarized in the following table:

| <u>Asset Class</u> | <u>Long-Term Target Asset Allocation</u> | <u>Long-Term Expected Real Rate of Return</u> |
|------------------------|--|---|
| U. S. Equity | 27.50% | 5.86% |

| Private Equity | 9.00% | 9.53% |
| Totals | <u>100.00%</u> | |

The discount rate used to measure the total pension liability was 6.90%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from participating employers will be made at the actuarially determined rates approved by PRSAC taking into consideration the recommendation of the System's actuary. Based on those assumptions, the System's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The mortality rate assumption used was set based upon an experience study performed on plan data for the period July 1, 2009, through June 30, 2014. The data was then assigned credibility weighting and combined with a standard table to produce current levels of mortality. This mortality was then projected forward to a period equivalent to the estimated duration of the System's liabilities. The RP-2000 Combined Healthy with Blue Collar Adjustment Sex Distinct Tables

The RP-2000 Disabled Lives Mortality Table set back five years for males and set back three years for females was selected for disabled annuitants. Setbacks in these tables were used to approximate mortality improvement.

Sensitivity to changes in the discount has been determined by measuring net pension liability at a discount rate that is one percentage point lower and one percentage point higher than the current rate. The results are presented as follows:

Municipal Police Employees' Retirement System of Louisiana

Plan Description - All full-time police department employees engaged in law enforcement are eligible to participate in the System. Any member of the Plan who commenced participation in the Plan before January 1, 2013 is eligible for retirement provided he or she meets one of the following conditions:

- At any age and has 25 years of creditable service
- At age 50 and has 20 years of creditable service
- At age 55 and has 12 years of creditable service.

Retirees are entitled to a retirement benefit, payable monthly for life, equal to 3^{1/3} percent of their final-average salary for each year of creditable service, not to exceed 100% of their final salary. Final-average salary is the employee's average salary over the 36 consecutive or joined months that produce the highest average. Employees who terminate with at least the amount of creditable service stated above, and do not withdraw their employee contributions, may retire at the ages specified previously and receive the benefit accrued to their date of termination.

Any member of the Plan who commenced participation in the Plan after January 1, 2013 is eligible for retirement based on Hazardous Duty and Non-Hazardous Duty sub plans. Under the Hazardous Duty sub plan, a member is eligible for retirement provided he or she meets one of the following conditions:

- At any age and has 25 years of creditable service
- At age 55 and has 12 years of creditable service.

Under the Non-Hazardous Duty sub plan, a member is eligible for retirement provided he or she meets one of the following conditions:

- At any age and has 30 years of creditable service
- At age 55 and has 25 years of creditable service.
- At age 60 and has 10 years of creditable service.

Under either Sub Plan, a member is eligible for early retirement after he or she has been a member of the System with 20 years of creditable service, with an actuarially reduced benefit from age 55. Under the Hazardous and Non-Hazardous Duty sub plans, the benefit rates are 3% and 2 1/2%, respectively, of average final compensation (Average monthly earnings during the highest 60 consecutive months or joined months if service was interrupted) per number of years of creditable service not to exceed 100% of final salary. The System also provides death and disability benefits for all members. Benefits are established or amended by state statute.

Funding Policy - Plan members are required by state statute to contribute a percent of their annual covered salary to the System. The percentage required for the measurement period ending June 30, 2021 is listed below:

| Hazardous Duty Members hired after January 1, 2013- | 10.00% |
| Non-Hazardous Duty Members hired after January 1, 2013 - | 8.00% |

The Town is required to contribute at an actuarially determined rate. The contribution requirements of plan members and the Town are established and may be amended by state statute. As provided by Louisiana Revised Statute 11:103, the employer contributions are determined by actuarial valuation and are subject to change each year based on the results of the valuation for the prior fiscal year. The Town's contributions to the plan were equal to the required contributions for each of the past three years.

Financial Summary – The plan description, funding policies and financial information provides a summary of the Plan provisions and finances. For additional details, the System issues an annual publicly available stand-alone financial report. The financial report includes information about the plan's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and fiduciary net position. The report can be obtained on the internet at lampers.org. The plans net pension liability was determined at June 30, 2020 (measurement date and actuarial valuation date) and details are provided as follows:

| | |
|---|----------------------|
| Total Pension Liability | \$ 3,350,028,394 |
| Plan Fiduciary Net Position | <u>2,816,973,727</u> |

| Town's Proportionate Share (Percentage) | 0.114195% |
| Town's Proportionate Share (Amount) | <u>\$ 608,721</u> |

The net pension liability presented above was not affected by any special funding situations. Changes in the Town's proportionate share of Plan's net pension liability during the measurement period ending June 30, 2021 are provided as follows:

| | |
|---|-------------------|
| Beginning Net Pension Liability | \$ 1,083,885 |

| Change in Deferred Inflows of Resources | <u>(248,665)</u> |
| Ending Net Pension Liability | <u>\$ 608,721</u> |

There were no changes between June 30, 2022 and the Plan's measurement date (June 30, 2021) that are expected to have a significant effect on the Town's proportionate share of the collective net pension liability. Balances presented as deferred outflows of resources and deferred inflows of resources reported in connection with participation in the plan are presented as follows:

Cost-of-Living Adjustments

The present value of future retirement benefits is based on benefits currently being paid by the System and includes previously granted cost of living increases.

The best estimates of the arithmetic nominal rates of return for each major asset class included in the System's target allocation as of June 30, 2021 are summarized in the following table:

| Asset Class | Target Allocation | Long Term Expected Portfolio Real Rate of Return |
|------------------------------------|--------------------------|---|
| Equity | 55.50% | 3.47% |
| Fixed Income | 30.50% | 0.59% |

| Totals | 100.00% | 5.08% |
| Inflation | | 2.22% |
| Expected Arithmetic Nominal Return | | 7.30% |

The discount rate used to measure the total pension liability was 6.750%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from participating employers will be made at the actuarially determined rates approved by PRSAC taking into consideration the recommendation of the System's actuary. Based on those assumptions, the System's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The mortality rate assumption used was set based upon an experience study performed by the prior actuary on plan data for the period July 1, 2009 through June 30, 2014 and review of similar law enforcement mortality. The data was then assigned credibility weighting and combined with a standard table to produce current levels of mortality. This mortality was then projected forward to a period equivalent to the estimated duration of the System's liabilities. Annuity values calculated based on this mortality were compared to those produced by using a setback of standard tables. The result of the procedure indicated that the tables used would produce liability values approximating the appropriate generational mortality tables

Sensitivity to changes in the discount has been determined by measuring net pension liability at a discount rate that is one percentage point lower and one percentage point higher than the current rate. The results are presented as follows:

NOTE 14 – CONTINGENCIES:

Existing conditions that may have financial consequences are referred to as contingencies. Contingencies existing at June 30, 2022 are described as follows:

Litigation

Like most governmental units with extensive and diverse operations, the Town is occasionally named as a defendant in litigation. At the present time, there are no matters pending that are expected to exceed the limits of insurance coverage.

Grant Compliance

The Town receives state and federal assistance through various grant programs. Grantor agencies routinely review grant activity and could request reimbursement if a dispute occurs regarding compliance with grant conditions.

NOTE 15 – SPECIAL ITEMS

An investigation by FEMA of assistance received in connection with Hurricane Gustav resulted in the prosecution of several former Town Officials. As a result of these prosecutions, a former Mayor, Town Clerk and Police Chief have entered guilty pleas in criminal proceedings. In addition to the criminal prosecutions, the Town has been required to repay a portion of the FEMA assistance in the amount of \$163,102.

NOTE 16 – ON BEHALF PAYMENTS

The State of Louisiana provides supplemental pay for public safety employees that meet certain requirements. Amounts reported as revenue and expenditures in connection with State Supplemental Pay are presented as follows:

| | |
|-------------------|------------------|
| Police Department | \$ 23,290 |
| Fire Department | <u>6,479</u> |

APPENDIX A
Statewide Agreed-Upon Procedures

Independent Accountant's Report
On Applying Agreed-Upon Procedures

To the Town of Ball and
the Louisiana Legislative Auditor:

We have performed the procedures enumerated below, which were agreed to by the Town of Ball (the Entity) and the Louisiana Legislative Auditor (LLA) on the control and compliance (C/C) areas identified in the LLA's Statewide Agreed-Upon Procedures (SAUPs) for the fiscal period July 1, 2021 through June 30, 2022. The Entity's management is responsible for those C/C areas identified in the SAUPs.

The entity has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of the engagement, which is to perform specified procedures on the C/C areas identified in LLA's SAUPs for the fiscal period described above. Additionally, LLA has agreed to and acknowledged that the procedures performed are appropriate for its purposes. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

We were engaged to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants and applicable standards of *Government Auditing Standards*. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on those C/C areas identified in the SAUPs. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of the entity and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

This report is intended solely to describe the scope of testing performed on those C/C areas identified in the SAUPs, and the result of that testing, and not to provide an opinion on control or compliance. Accordingly, this report is not suitable for any other purpose. Under Louisiana Revised Statute 24:513, this report is distributed by the LLA as a public document.
