Why We Conducted This Audit

We conducted a financial statement audit of the State Board of Certified Public Accountants of Louisiana (Board) for the year ended June 30, 2019, to provide accountability over public funds.

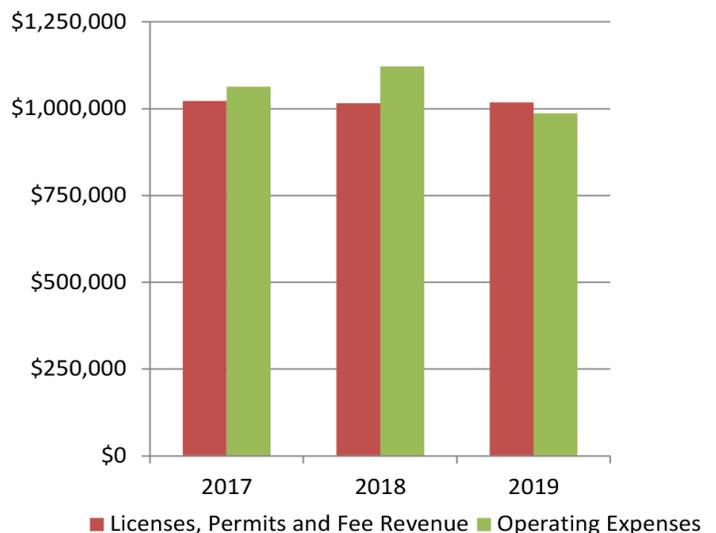

What We Found

- The Board’s financial statements, as adjusted, are fairly stated.
- We did not identify any deficiencies in internal control over financial reporting that we considered to be material weaknesses or instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.
- As shown in the charts below, the number of total credentials issued by the Board, and the resulting revenue from licenses, permits, and fees, has been fairly consistent over the last three years. Operating expenses decreased in fiscal year 2019 mainly due to decreases in state retirement expenses, group health insurance expense, and software enhancements.
