INDEPENDENT AUDITOR'S REPORT

The Honorable Michael Tubre, Mayor
& Members of the Village Council
Harrisonburg, Louisiana

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and the aggregate remaining fund information of the Village of Harrisonburg, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the Village of Harrisonburg's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and the aggregate remaining fund

information of the Village of Harrisonburg, as of June 30, 2019, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Village of Harrisonburg's basic financial statements. The Schedule of Compensation Benefits and Other Payments to Agency Head or Chief Executive Officer and schedules of LCDBG Funds are presented for purposes of additional analysis and is not a required part of the basic financial statements.

The Schedule of Compensation of Benefits and Other Payments to Agency Head or Chief Executive Officer and schedules of LCDBG Funds are the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion the Schedule of Compensation Benefits and Other Payments to Agency Head or Chief Executive Officer and schedules of LCDBG Funds are fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 6, 2019, on our consideration of the Village of Harrisonburg's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Village of Harrisonburg's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the Village, we offer readers of the Village of Harrisonburg's financial statements this narrative overview and analysis of the financial activities of the Village for the fiscal year ended June 30, 2019. We encourage readers to consider the information presented here in conjunction with the Village's financial statements.

The Management's Discussion and Analysis (MD&A) is an element of the new reporting model adopted by the Governmental Accounting Standards Board (GASB) in their Statement No. 34 Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments issued June 1999.

FINANCIAL HIGHLIGHTS

Governmental Funds

- The assets of the Village exceeded its liabilities at the close of the most recent fiscal year by \$470,706 (*net position*). This is a \$22,251 decrease from last year.
- The Village had total revenue of \$143,738. This is a \$11,876 decrease from last year's revenues, mainly due to a decrease in loan proceeds in the amount of \$22,770.
- The Village had total expenditures of \$325,856, which is a \$59,116 increase from last year.

Enterprise Funds

- The assets of the Village exceeded its liabilities at the close of the most recent fiscal year by \$2,143,859 (*net position*). This is a \$8,255 decrease from last year.
- The Village had total revenue of \$860,636. This is a \$50,477 decrease from last year, mainly due to a decrease in capital contributions in the amount of \$168,009.
- The Village had total expenses of \$689,967. This is a \$50,421 decrease from last year, mainly due to a decrease in administration/personnel cost in the amount of \$57,353.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Village's basic financial statements. The Village's basic financial statements consist of two components: 1) fund financial statements, and 2) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves. The Village is a special-purpose entity engaged only in governmental activities. Accordingly, only fund financial statements are presented as the basic financial statements.

FUND FINANCIAL STATEMENTS

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Village, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

USING THIS ANNUAL REPORT

The Village's annual report consists of financial statements that show information about the Village's funds, enterprise funds and governmental funds.

Our auditor has provided assurance in his independent auditor's report, located immediately preceding this Management's Discussion and Analysis, that the basic financial statements are fairly stated. Varying degrees of assurance are being provided by the auditor regarding the other information included in this report. A user of this report should read the independent auditor's report carefully to ascertain the level of assurance being provided for each of the other parts of this report.

REPORTING THE DISTRICT'S MOST SIGNIFICANT FUNDS

The Village's financial statements provide detailed information about the most significant funds. The Village may establish other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using capital contributions and other money. The Village's enterprise fund uses the following accounting approach:

All of the Village's services are reported in an enterprise fund. They are reported using the full accrual method of accounting in which all assets and all liabilities associated with the operation of these funds are included on the balance sheet. The focus of proprietary funds is on income measurement, which, together with the maintenance of equity, is an important financial indication.

Amounts reported for Governmental Activities in the Statement of Activities are different because:

<p>Governmental Funds report capital outlays as expenditure. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. <p>The issuance of long-term debt (bonds, leases, etc.) provides current financial resources to Governmental Funds, while the repayment of the principal of long-term debt consumes the current financial resources of Governmental Funds. Neither transaction, however, has any effect on net position. Also, Governmental Funds report the effect of issuance costs premiums, discounts, and similar items when debt is issued, whereas these amounts are deferred and amortized in the Statement of Activities. Financial Statements**

VILLAGE OF HARRISONBURG, LOUISIANA

NOTES TO THE BASIC FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Village of Harrisonburg was incorporated October 18, 1923, under the provisions of the Lawrason Act. The Village operates under the Mayor-Board of Alderman form of government. The Village provides the following significant services to its residents as provided by its charter: public safety (police and fire), highways and streets, utilities (water, gas and sewer services) and general administrative functions, including coordination of related services with parish, state and federal governing bodies.

The accounting and reporting policies of the Village of Harrisonburg conform to generally accepted accounting principles as applicable to governments. Such accounting and reporting procedures also conform to the requirements of Louisiana Revised Statutes 24:517 and to the guides set forth in the Louisiana Municipal Audit and Accounting Guide, and to the industry audit guide, Audits of State and Local Governmental Units.

A. GOVERNMENT-WIDE & FUND FINANCIAL STATEMENTS

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Changes in Net Position) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or segment and 2) Capital Contributions and contributions that are restricted to meetings the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

B. MEASUREMENT FOCUS, BASIS OF ACCOUNTING, & FINANCIAL STATEMENT PRESENTATION

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred,

VILLAGE OF HARRISONBURG, LOUISIANA

NOTES TO THE BASIC FINANCIAL STATEMENTS CONTINUED

regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Capital contributions and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due. Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The municipality reports the following major governmental funds:

The General Fund is the municipality's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The municipality reports the following major proprietary funds:

- Water Fund
- Sewer Fund
- Gas Fund

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the government's enterprise operations. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Principal operating revenues are utility billings. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

VILLAGE OF HARRISONBURG, LOUISIANA

NOTES TO THE BASIC FINANCIAL STATEMENTS CONTINUED

C. EQUITY CLASSIFICATIONS

In the government-wide financial statements, equity is classified as Net Position and displayed in three components as applicable. The components are as follows:

Invested in Capital Assets - Capital assets including restricted capital assets, when applicable, net of accumulated depreciation.

Restricted Net Position - Net position with constraints placed on their use either by (1) external groups such as creditors, grantors, contributors, or laws or regulations of other governments or (2) law through constitutional provisions or enabling legislation.

Unrestricted Net Position - All other net position that does not meet the definition of “restricted” or “invested in capital assets”.

When an expense is incurred for the purposes for which both restricted and unrestricted net position is available, management applies restricted resources first. The policy concerning which to apply first varies with the intended use and legal requirements. The decision is typically made by management at the incurrence of the expense.

In the Fund Financial Statements, governmental fund equity is classified as a fund balance. The District has implemented GASB Statement 54 “Fund Balance Reporting and Governmental Fund Type Definitions.” This Statement provides more clearly defined fund balance categories to make the nature and extent of the constraints placed on the purposes for which resources can be used:

- a. Nonspendable fund balance – amounts that are not in a spendable form (such as prepaid expenses) or are required to be maintained intact;
- b. Restricted fund balance – amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions, or by enabling legislation;
- c. Committed fund balance – amounts constrained to specific purposes by a government itself using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint;
- d. Assigned fund balance – amounts a government intends to use for a specific purpose; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority;
- e. Unassigned fund balance – amounts that are available for any purpose; positive amounts are reported only in the general fund.

D. CASH & CASH EQUIVALENTS

The Village’s cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of six months or less from the date of acquisition. State law and the municipality’s investments policy allow the municipality to invest in collateralized certificate of deposits, government-backed securities, commercial paper, the state sponsored investment pool, and mutual funds consisting solely of government-backed securities.

E. RECEIVABLES & PAYABLES

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either “due to/from other funds” (i.e., the current portion of interfund loans) or “advances to/from other funds” (i.e., the noncurrent portion of interfund loans). All other outstanding balances between funds are reported as “due to/from other funds”. Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as “internal balances”.

F. AD VALOREM TAXES

Property taxes are levied on a calendar year basis and become due by January 1 of each year. The following shows the amount of authorized and levied ad valorem taxes on property with assessed valuations totaling \$1,346,709.

General purposes	7.24 mills
 Total taxes levied	 \$9,750

G. RESTRICTED ASSETS

Restricted assets include cash and cash investments in the proprietary funds which are restricted.

Restricted assets were applicable to the following at June 30, 2019:

H. CAPITAL ASSETS

Capital assets, which include property, plant, equipment, and infrastructure assets, are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are capitalized at historical cost or estimated cost if the historical cost is not available. Donated assets are recorded as capital assets at their estimated fair market value at the date of donation. The Village of Harrisonburg maintains a threshold level of \$1,500 or more for capitalizing capital assets.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

For the year ended June 30, 2019, no interest costs were capitalized for construction of fixed assets.

Gas, Water, & Sewer Systems	40 years
Vehicles and Equipment	5-10 years
Parking Lot	20 years

I. INVENTORIES

Inventories of materials and supplies are considered to be expenditures at the time purchased. Amounts on hand at the financial statement date are considered immaterial and therefore not included on the statements of assets and liabilities.

J. LONG-TERM OBLIGATIONS

In the government-wide financial statements and the proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position.

K. FUND EQUITY

In the fund equity statements, governmental funds report reservations of fund balances for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plan that are subject to change.

L. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. CASH, CASH EQUIVALENTS, & INVESTMENTS – (C.D.’S IN EXCESS OF 90 DAYS)

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the government will not be able to recover its deposits. Under state law, these deposits (or the resulting bank balances) must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit with the fiscal agent.

These securities are held in the name of the pledging fiscal agent bank in a holding or custodial bank that is mutually acceptable to both parties.

Louisiana Revised Statute 39:1229 imposes a statutory requirement on the custodial bank to advertise and sell the pledged securities within 10 days of being notified by the Entity that the fiscal agent bank has failed to pay deposit funds upon demand. Further, Louisiana Revised Statute 39:1224 states that securities held by a third party shall be deemed to be held in the Entity’s name.

Deposits

It is the Village’s policy for deposits (demand checking accounts, savings accounts, and certificate of deposits) to be 100% secured by collateral at market or par, whichever is lower, less the amount of the Federal Deposit Insurance Corporation insurance. The Village’s deposits are categorized to give an indication of the level of risk assumed by the Village at year end. The categories are described as follows:

- ***Category 1*** – Insured or collateralized with securities held by the Village or by its agent in the Village’s name.
- ***Category 2*** – Collateralized with securities held by the pledging financial institution’s trust department or agent in the Village’s name.
- ***Category 3*** – Uncollateralized.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

The Honorable Michael Tubre, Mayor
& Members of the Village Council
Harrisonburg, Louisiana

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business type activities, and the aggregate remaining fund information of the Village of Harrisonburg, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the Village of Harrisonburg's basic financial statements, and have issued our report thereon dated November 6, 2019.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Village of Harrisonburg's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Village of Harrisonburg's internal control. Accordingly, we do not express an opinion on the effectiveness of the Village of Harrisonburg's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. *A material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. Given these limitations, during our audit we did not identify any

deficiencies in internal control that we consider to be material weaknesses. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and questioned costs as items **(2019-1 Small Size of Entity)** that we consider to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Village of Harrisonburg's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and questioned costs as items: **2019-2 Bond Reserve Accounts Required by Bond Covenants, 2019-3 Budget Variance, and 2019-4 Bond Commission Approval For Loans.**

Village of Harrisonburg's Response to Findings

The Village of Harrisonburg's response to the findings identified in our audit is described in the accompanying Schedule of Findings and Questioned Costs. The Village of Harrisonburg's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

This report is intended solely for the information and use of the audit committee, management, federal awarding agencies and Legislative Auditor's Office and is not intended to be and should not be used by anyone other than these specified parties. However, this report is a public document and its distribution is not limited.

Recommendation: We recommend that management continue to provide the necessary oversight in its current internal control procedures, specifically in the areas of cash receipts, collection receipt activities, recordation of those receipts, depositing of funds collected, and review of checks written.

Client Response and Corrective Action: Management will continue to provide the necessary oversight in its current internal control procedures, specifically in the areas of cash receipts, collection receipt activities, recordation of those receipts, depositing of funds collected, and review of checks written.

Randomly select two deposit dates for each of the 5 bank accounts selected for procedure #3 under "Bank Reconciliations" above (select the next deposit date chronologically if no deposits were made on the dates randomly selected and randomly select a deposit if multiple deposits are made on the same day).
