Under the provisions of state law, this report is a public document. A copy of this report has been submitted to the Governor, to the Attorney General, and to other public officials as required by state law. A copy of this report has been made available for public inspection at the Baton Rouge office of the Legislative Auditor.

This document is produced by the Legislative Auditor, State of Louisiana, Post Office Box 94397, Baton Rouge, Louisiana 70804-9397 in accordance with Louisiana Revised Statute 24:513. Eight copies of this public document were produced at an approximate cost of \$63.20. This material was produced in accordance with the standards for state agencies established pursuant to R.S. 43:31. This report is available on the Legislative Auditor's Web site at www.la.state.la.us. When contacting the office, you may refer to Agency ID No. 9726 or Report ID No. 07100854 for additional information.

In compliance with the Americans With Disabilities Act, if you need special assistance relative to this document, or any documents of the Legislative Auditor, please contact Wayne "Skip" Irwin, Director of Administration, at 225-339-3800.

June 6, 2007

The Honorable Donald E. Hines,
President of the Senate
The Honorable Joe R. Salter,
Speaker of the House of Representatives

Dear Senator Hines and Representative Salter:

This report provides the results of our work to address House Concurrent Resolution (HCR) 204 of the 2006 Regular Legislative Session. HCR 204 urges and requests the legislative auditor to perform an in-depth analysis of one or more municipalities with a reputation for excessive speed limit enforcement, with an emphasis on the number of tickets issued for violations and the amount of revenue derived from these tickets. The resolution also suggests that we work together with the Department of Transportation and Development (DOTD). Our office and DOTD cooperated throughout this project.

The report contains our findings, conclusions, and two matters for legislative consideration. Appendix B contains fines and forfeiture rankings for 304 municipalities in Louisiana. Appendix D contains traffic violation convictions reported to the Department of Public Safety for these municipalities. I hope this report will benefit you in your legislative decision-making process.

Sincerely,

Steve J. Theriot, CPA
Legislative Auditor

EXECUTIVE SUMMARY

We were unable to perform the in-depth analysis on excessive speed limit enforcement requested by House Concurrent Resolution (HCR) 204 of the 2006 Regular Legislative Session because of a lack of data. The following findings describe the problems we had in obtaining data and the best practices we identified regarding the establishment and enforcement of speed limits.

Performance Audit Findings

- **Local municipalities could not provide sufficient data for us to conduct the in-depth analysis requested by HCR 204.** Overall, we were not able to obtain sufficient data from the 39 municipalities we surveyed to perform any meaningful analysis regarding excessive fine enforcement. Municipalities had difficulty providing number of traffic tickets, number of convictions, and amount of revenue to us. They had more difficulty providing these numbers to us broken down by violation type (e.g., speeding).
- **We could not use data from other sources for our analysis because we could not verify the data.** The Department of Public Safety (DPS) and the Louisiana Supreme Court also receive information regarding traffic violation convictions from courts around the state. However, when we compared the data we received to the data received by DPS and the Supreme Court, the discrepancies were so large that we were unable to verify and use the data from DPS and the Supreme Court.
- **Municipal governments cannot set speed limits on state highways.** Louisiana law does not allow municipal governments to establish speed limits on state highways. In addition, municipal governments cannot establish speed limits on non-state highways that exceed speed limits established in state law. The Department of Transportation and Development (DOTD) is responsible for setting speed limits on state highways. DOTD can withhold funding from municipalities if it receives a complaint and determines that a local speed limit is not based on a traffic engineering study.
- **Louisiana appears to use best practices when setting speed limits.** We researched other states and national organizations for best practices on setting speed limits and compared them to Louisiana. Louisiana uses similar standards to those used in other states. In addition, Louisiana employs practices that the federal government and several national organizations recommend.
- **Other states have laws regarding enforcement of speed limits.** There are some states that have laws that are commonly referred to as speed trap laws. Louisiana does not appear to have similar laws. These laws take away incentives for local government to participate in excessive enforcement of traffic laws to generate revenue. In addition, these laws prohibit excessive speed enforcement activity.

INTRODUCTION

Audit Initiation and Objectives

The Louisiana Legislature passed House Concurrent Resolution (HCR) 204 during the 2006 Regular Legislative Session. This resolution requests the Department of Transportation and Development (DOTD) to study speed limits and its enforcement on state and U.S. highways within municipalities. It also urges and requests the legislative auditor to perform an in-depth analysis of one or more municipalities with a reputation for excessive speed limit enforcement. The resolution called for our office to emphasize the number of tickets issued for violations and the amount of revenue derived from these tickets.

We attempted to answer the following objectives during this performance audit:

1. Is evidence available to determine whether municipalities in Louisiana have excessive speed limit enforcement?
2. Can municipal governments set speed limits on state highways?
3. What are some best practices for establishing and enforcing speed limits?

Background

To answer the resolution and our objectives, we needed to determine which municipalities had a reputation for excessive speed limit enforcement. We chose two objective methodologies to select municipalities that might be at risk for excessive speed limit enforcement. From a total of 304 statewide municipalities, we selected the 30 municipalities with the highest percentage of revenue from fines and forfeitures and 30 municipalities with the highest fine and forfeiture revenue per capita. These methodologies gave us a list of 39 unique municipalities because some were on both lists.

Exhibit 1 on the following page lists these 39 municipalities and presents their overall ranking out of the total 304 municipalities. We have ranked the municipalities according to their percent of revenue from fines and forfeitures and fines and forfeitures per capita. The majority of the data in Exhibit 1 is from FY 2005 because FY 2006 financial data was not available. However, we were able to use FY 2006 data for three of the municipalities listed in the table. Appendix B contains the percent of revenue from fines and forfeitures and the fines and forfeitures per capita for all municipalities in the state. The majority of these financial data are from FY 2005.

Exhibit 1 FY 2005 Percent of Revenue From Fines and Forfeitures and Fines and Forfeitures Per Capita for the 39 Selected Municipalities					
	Municipality	% of Revenue From Fines and Forfeitures	Rank - % of Revenue From Fines and Forfeitures*	Fines and Forfeitures Per Capita Population	Rank - Fines and Forfeitures Per Capita Population*
1	Anacoco	42.88%	22	\$78.24	67

38	Washington	50.84%	14	370.49	8
39	Woodworth	61.32%	7	705.98	5

***Note:** The rankings above are based on all 304 municipalities (see Appendix B for full list).

Source: Prepared by legislative auditor's staff using information obtained from municipalities' annual financial statements and the U.S. Census Bureau.

We surveyed the 39 municipalities to obtain the data needed to perform the in-depth analysis requested by HCR 204. We requested data for fiscal years 2004 through 2006. As shown in Exhibit 2, 77% of the municipalities surveyed responded to our initial survey and 52% responded to the subsequent follow-up survey. In total, we received surveys from 30 municipalities.

Exhibit 2		
Response Rates for Surveyed Municipalities		
Municipality	Initial Survey	Follow-up Survey
Total Received	30	20
% Received	76.92%	51.28%
Total Not Received	9	19
% Not Received	23.08%	48.72%

IS EVIDENCE AVAILABLE TO DETERMINE WHETHER MUNICIPALITIES IN LOUISIANA HAVE EXCESSIVE SPEED LIMIT ENFORCEMENT?

Local Municipalities Could Not Provide Sufficient Data for Us to Conduct the In-Depth Analysis Requested by HCR 204

The 39 local municipalities we surveyed were unable to collectively provide sufficient data for us to conduct the in-depth analysis requested by the Louisiana Legislature. Municipalities had trouble reporting general traffic fine data as well as more detailed data to us. For example, for FY 2006, 80% of the municipalities were able to provide us the total number of traffic tickets issued, but only 40% were able to provide us the number of convictions. When asked to provide the number of tickets issued by violation type (e.g., speeding), only 50% reported they were able to do so. In addition, although 73% could tell us how much revenue was received in FY 2006 from traffic convictions, only 10% could break that down by violation type. We had similar results with fiscal years 2004 and 2005 (see Appendix C for details).

We attempted to obtain the necessary information for this analysis through a survey (see Appendix C for the survey results) which included multiple contacts with the 39 municipalities and follow-up. We sent surveys via e-mail, postal mail, and fax requesting data for fiscal years 2004 through 2006. At some point during our survey and follow-up process, we contacted 38 of the 39 chosen municipalities by phone (we were unable to reach the 39th municipality despite repeated efforts).

Exhibit 3 demonstrates the problems we had obtaining the necessary data from the municipalities that returned our survey. For example, while many communities were able to report the number of traffic tickets issued, some of the same entities could not provide the number of convictions or the amount of revenue collected for traffic violations only.

Exhibit 3 FY 2006 Survey Results					
Number of tickets issued in FY 2006			Can this number be broken down by violation type?		
Able to provide number of tickets issued	24	80.00%	Yes	15	50.00%
Not able to provide number of tickets issued	6	20.00%	Yes with clarification	1	3.33%
			Answered No or did not answer question	14	46.67%
Total	30		Total	30	

Exhibit 3 FY 2006 Survey Results					
Number of convictions for traffic violations of municipal ordinances for FY 2006			Can this number be broken down by violation type?		
Able to provide number of convictions for traffic violations	12	40.00%	Yes	8	26.67%
Not able to provide number of convictions for traffic violations	18	60.00%	Yes with clarification	1	3.33%
			Answered No or did not answer question	21	70.00%
Total	30		Total	30	
Amount of revenue received from traffic violations in FY 2006			Can this revenue be broken down by violation type?		
Able to provide amount of revenue received from traffic violations	22	73.33%	Yes	3	10.00%
Not able to provide amount of revenue received from traffic violations	8	26.67%	Answered No or did not answer question	27	90.00%
Total	30		Total	30	

Reasons for Data Problems. Many of the municipalities cited similar reasons explaining their inability to provide the requested information. Most explained that their systems, whether manual or electronic, did not allow them to easily pull the requested data. Many municipalities still use manual systems (i.e., tickets in a box or manually logged in notebook) and obtaining the information would have required them to pull the information by hand from each individual citation or entry in the logbook. Most informed us that they had limited resources and such a request would be too burdensome. Others that had electronic systems cited reasons such as the systems did not contain the requested information or they did not know how to pull the data from the system. These types of situations made it difficult for municipalities to report necessary data and prohibited us from conducting any meaningful analysis.

We Could Not Use Data From Other Sources (DPS or Supreme Court) for Our Analysis Because We Could Not Verify the Data

The Louisiana Department of Public Safety (DPS) and the Louisiana Supreme Court collect information regarding traffic convictions from courts around the state. We considered using these sources of information to conduct the requested in-depth analysis. However, we could not verify the reliability of this data. As Exhibit 4 on pages 12-13 shows, only seven of the 39 municipalities provided traffic violation convictions to all three sources (the Legislative Auditor’s Office, the DPS, and the Supreme Court). In the seven instances where data was

available from all three sources, the numbers have wide discrepancies. After identifying such discrepancies, we had to conclude that the data is unreliable.

Problems With Data Reported to DPS. We obtained the traffic violation conviction data from DPS to determine if it was complete and if it would enable us to perform any in-depth analysis for the selected municipalities. However, for the majority of the selected municipalities, the information from the DPS database did not match the information reported in the survey. It often appeared that the municipalities were not reporting all of the traffic convictions to DPS. Therefore, we were reluctant to use this data for analysis purposes because its reliability and completeness seemed to be in question.

In addition to the extreme discrepancies in the total number of convictions reported to us versus what was reported to DPS, the breakdown of the convictions is extremely dissimilar (see Appendix D for the breakdown of convictions reported to DPS). For example, the mayor's courts in our sample reported to DPS that 54.91% of the convictions for traffic violations were for written promise violations. However, none of the same courts reported written promise violations when they provided us with a breakdown. These violations are issued when someone fails to appear in court or pay the ticket by mail. This type of conviction results in the suspension of the violator's driver's license.

Louisiana Revised Statute (R.S.) 32:393 requires all courts (including mayor's courts) to report convictions of traffic violations (except for parking violations) to DPS. In addition, the statute requires that the miles per hour in excess of the speed limit be included on the report. The law also requires reporting of such information as the amount of the fine. Although state law requires the courts to report the information to DPS, it does not require DPS to verify what is reported or to enforce the reporting requirements. DPS staff informed us that they are uncertain if anyone has ever checked to verify who is and who is not reporting to the database. During our follow-up survey, we asked the municipalities if they report the data requested to any other entities. All of the municipalities should have responded yes because all courts are required to report traffic convictions to DPS according to R.S. 32:393. However, only 13 of the 20 who responded to our follow-up survey (65%) said they report the information requested in our survey to another entity on a regular basis. Appendix C contains all of the responses as reported on the survey.

Problems With Data Reported to Supreme Court. LA C.Cr.P.Art.887 requires courts to submit \$2.00 (\$1.00 for mayor's courts located in municipalities with a population less than 2,000) for all convictions (including traffic violation convictions) to the Supreme Court for support of the Court Management Information System. The Supreme Court provided us with the monthly reports submitted by the municipalities we selected for analysis. The municipalities base their payments to the Supreme Court on these monthly numbers. After collating this data, we found inconsistencies in the convictions reported via our survey, the convictions reported to DPS, and the traffic convictions reported to the Supreme Court. However, we could not determine why these discrepancies exist and we were unable to determine which data should be used for analysis. For the most part, the numbers reported to the Supreme Court were lower than the numbers reported to our office. An official with the Supreme Court was concerned about the existence of discrepancies between data reported to us and data reported to the Supreme Court.

Exhibit 4 shows the discrepancies between the three sources of data for convictions for traffic violations for the 39 selected municipalities.

Exhibit 4

Municipality	Number of convictions for traffic violations for FY 2006 reported by mayor's courts		
Turkey Creek	236	14	Did not provide data to Supreme Court
Vinton	Could not provide	20	122
Urania	Could not provide	18	2,265
Washington	Did not send in survey	509	4,167
Woodworth	6,878	1,754	5,050
<p>*Note: Number presented is number of tickets issued. Municipality misunderstood survey question and upon follow-up indicated that convictions closely match number of tickets issued. Those municipalities that are shown as “could not provide” data for our survey could not provide the number of convictions for traffic violations.</p> <p>Source: Compiled by legislative auditor’s staff using information received from the 39 municipalities in the survey, DPS, and the Louisiana Supreme Court.</p>			

Matter for Legislative Consideration 1: The legislature may wish to consider whether state law could be strengthened to ensure that DPS receives accurate traffic violation conviction data from municipalities in a timely and consistent manner. For example, the use of penalties for those municipalities not reporting might encourage a more consistent presentation of data. Also, detailed language in law specifically directing reporting methods for municipalities may help.

**CAN MUNICIPAL GOVERNMENTS SET SPEED LIMITS
ON STATE HIGHWAYS?**

**Municipal Governments Cannot Set Speed Limits on State
Highways**

Louisiana law does not allow municipal governments to establish speed limits on state highways. In addition, municipal governments cannot establish speed limits on non-state highways that exceed speed limits established in state law. Furthermore, DOTD can withhold funding from local governments to encourage speed limit compliance with traffic engineering studies.

Louisiana law determines who is responsible for setting speed limits on highways and roads. R.S. 32:2 states that DOTD supervises and regulates all traffic on all state highways and has the authority to supervise and regulate all traffic on all highways (i.e., streets) within this state. R.S.32:61 establishes statutory speed limits of 70 MPH on interstates and controlled access highways, 65 MPH on other multi-lane divided highways which have partial or no control of access, and 55 MPH on other highways (i.e., streets). The state may increase or decrease speed limits based upon engineering and traffic investigations conducted by DOTD (R.S. 32:63).

According to R.S. 32:41 and 32:42, municipal and parish authorities have the power to establish speed limits and speed zones on highways other than state maintained highways within their corporate limits so long as they are not in excess of the state established maximum speed limits. According to a DOTD official, R.S. 32:235 provides that DOTD can withhold funding from municipalities that do not comply with DOTD's standards for setting speed limits. More specifically, if DOTD receives a complaint against a municipality, it will investigate. If the department finds that the speed limit is not based on a traffic engineering study, it will withhold funding until a study is done and the speed limit is established in accordance with the study.

This page is intentionally blank.

WHAT ARE SOME BEST PRACTICES FOR ESTABLISHING AND ENFORCING SPEED LIMITS?

Louisiana Appears to Use Best Practices When Setting Speed Limits

We researched other states and national organizations for best practices on setting speed limits and compared them to Louisiana. Louisiana seems to use similar standards as those used in other states. Also, Louisiana employs practices that the federal government and several national organizations recommend.

For example, it appears most states set speed limits using engineering studies that incorporate the 85th percentile speed, including Louisiana. Traffic engineers use the 85th percentile speed by monitoring traffic (during non-peak hours) to determine the speed under which 85% of the drivers are traveling. The road speed is then set at that number unless there are other factors to consider. The Transportation Research Board (an independent adviser to the federal government) considers the 85th percentile speed a safe and reasonable speed limit and states that speed limits should be set as close to the 85th percentile as possible.

In addition, states that have adopted the Federal Highway Administration's Manual (FHWA) on Uniform Traffic Control Devices or conform to its standards (a total of 48 states including Louisiana) are supposed to only display speed limit signs after traffic engineering studies have been conducted. Louisiana law (R.S. 32:63) allows DOTD to increase or decrease speed limits based upon engineering and traffic investigations conducted by DOTD. Organizations such as the Transportation Research Board, American Association of State Highway Transportation Officials, and the Institute of Transportation Engineers recommend that speed limits should be established on the basis of traffic engineering studies.

Other information we found from the FHWA states that pace speed, crash history, roadside development, and road design are additional factors that should be considered when establishing a speed limit. In addition, the FHWA recommends that speed limits be reevaluated (e.g., at least once every 5 years) when there have been significant changes in roadway characteristics or surrounding land. Louisiana does not have an official policy regarding the reevaluation of speed limits.

Other States Have Laws Regarding Enforcement of Speed Limits

There are some states that have laws that are commonly referred to as speed trap laws. Louisiana does not appear to have similar laws. These laws commonly take away incentives for local government to participate in excessive enforcement of traffic laws, particularly when that enforcement is for revenue generating purposes instead of public safety purposes. Exhibit 5 contains a summary of the speed limit enforcement laws we found in other states.

Exhibit 5	
Speed Limit Enforcement Laws in Other States	
State	Key Provisions/Description
Alabama	Limits the number of speed limit changes in a mile to 6 and establishes that adjacent limits cannot differ by more than 10 mph.
Arizona	Limits the number of speed limit changes in a mile to 6 and establishes that adjacent limits cannot differ by more than 10 mph.
Arkansas	<p>Municipalities can be investigated for abusing police power.</p> <ul style="list-style-type: none"> ▪ A finding that the amount of revenue produced by traffic fines exceeds 30% of the municipality’s total expenditures OR more than 50% of the summonses written for speeding are for violations that are 10 mph or less than the posted speed limit indicates an abuse of police power. ▪ Upon determining an abuse of police power, the prosecuting attorney can order that the municipality cease patrolling the highways OR order that fines and court costs received from traffic law violations be paid to a county fund.
California	Defines a speed trap, prohibits officers from using speed traps, and indicates that any evidence of speed gained from a speed trap cannot be used in court.
Missouri	When a municipality receives more than 45% of its revenue from traffic violations on state highways, then revenues in excess of 45% of total annual revenue is to be sent to the Department of Revenue and will be disbursed to the schools in the county.
Oklahoma	Any person can request the commissioner to investigate traffic enforcement of a municipal law enforcement agency whose jurisdiction includes portions of federal aid highways or state highways if they believe the purpose of the enforcement is to generate more than 50% of the revenue needed for the operation of the municipality.
Texas	Municipalities with a population less than 5,000 may only retain fines equal to 30% of the total local revenue from the previous fiscal year. The remaining funds are sent to the comptroller.
Washington	Defines a speed trap and indicates when speed of a vehicle determined by a speed trap can and cannot be used as evidence in court.
Source: Prepared by legislative auditor’s staff using statutes obtained from Westlaw.	

Matter for Legislative Consideration 2: The legislature may wish to conduct an extensive study of speed limit enforcement laws that other states have and determine whether Louisiana could benefit by having similar laws.

Appendix A: Scope and Methodology

We conducted this work to address HCR 204. Our work was conducted under the provisions of Title 24 of the Louisiana Revised Statutes of 1950, as amended. Although this is not a performance audit, we attempted to follow generally accepted government auditing standards as promulgated by the Comptroller General of the United States.

Audit Scope

HCR 204 of the 2006 Regular Legislative Session directs the legislative auditor to perform an in-depth analysis of one or more municipalities with a reputation for excessive speed limit enforcement. This measure directed us to place emphasis on the number of tickets issued for violations and the amount of revenue derived from these tickets. We selected 39 municipalities that are at a high risk for excessive speed limit enforcement. We then sought data on number of tickets issued, number of convictions, and amount of revenue, all broken down by violation type, for fiscal years 2004, 2005, and 2006 to conduct the in-depth analysis.

We planned to obtain this information to conduct an in-depth analysis that would further determine if these are municipalities with excessive speed limit enforcement. We wanted to determine if the number of tickets issued and revenue collected were reasonable. We intended to analyze the speeding violations to determine if the communities were “overzealous” in their enforcement of speed limits. For example, one indication might be that a municipal law enforcement agency issued a large number of tickets for speeding less than 5 or 10 miles per hour over the speed limit. However, as stated above, we were unable to obtain data that would allow us to do so.

Methodology

To complete this audit, we performed the following tasks:

- Reviewed Louisiana laws related to establishing speed limits and reporting requirements for traffic violations and convictions
- Identified best practices from other states, national organizations, and the federal government for establishing speed limits and compared that to how Louisiana sets speed limits
- Identified laws in other states related to speed limit enforcement
- Reviewed the most recent financial statements of all municipalities in Louisiana to identify which municipalities might be at a high risk for excessive speed limit enforcement

- Selected the 30 municipalities with the highest percentage of revenue from fines and forfeitures and the 30 municipalities with the highest fine and forfeiture revenue per capita to perform an in-depth analysis
 - Upon combining the two lists of 30 municipalities each, we were left with 39 unique municipalities since some municipalities appeared on both lists
- Provided DOTD with the list of 39 municipalities and communicated with DOTD to obtain information on setting speed limits
- Surveyed the municipalities to obtain information on traffic tickets issued, traffic violation convictions, and revenue received from those convictions for FY 2004 through FY 2006
- Compiled and analyzed survey data received from the municipalities
- Communicated with DPS and Supreme Court officials to determine what traffic conviction data was available
- Obtained and analyzed data from DPS and the Louisiana Supreme Court related to traffic violation convictions
- Communicated with Representative Hollis Downs to ensure that his concerns were addressed and provided him with briefings regarding preliminary report findings
- Conducted other research, analysis, and procedures as needed

APPENDIX B: FINES AND FORFEITURE RANKINGS

Breakdown of Fiscal Years Used to Obtain Fine and Forfeiture Data		
FY Used	Count	Percent
2004	5	1.64%
2005	275	90.46%
2006	23	7.57%
N/A	1	0.33%
Total	304	100.00%
Source: Prepared by legislative auditor's staff using information obtained from the municipalities' most recent financial statements.

Detailed Survey Responses						
	Municipality	Ferriday	Fisher	French Settlement	Georgetown	Golden Meadow
	Survey Received	Yes	Yes	Yes	Yes	Yes
1.	Does your municipality record traffic tickets issued by the local municipal law enforcement agency and fines collected by the mayor's court manually or electronically?	Electronic	Manually	Both	Manually	Both
2.	Please indicate what information you will not be able to provide and why.	Burdensome to break down everything any further since it would have to be done manually even though we have a computer system.	Did not answer	We had to manually pull the information, break it down by counting. This took days to calculate by municipal employees of Mayor's court and Mayor (Note: information was provided).	Questions not answered are due to the fact that we have a manual system and limited staff. It would be very time consuming and difficult to get the answers to our questions.	Did not answer
3.	What fiscal year does your municipality operate on?	July 1 - June 30	July 1 - June 30	Jan 1 - Dec 31	July 1 - June 30	Did not answer
4.	Number of tickets issued in FY 2004 (see question #3 for timeframe).	1,353	593	434	2,220	2,056

LOUISIANA MUNICIPALITIES

Detailed Survey Responses						
	Municipality	Iowa	Lillie	Livonia	Maurice	McNary
	Survey Received	Yes	Yes	Yes	Yes	Yes
1.	Does your municipality record traffic tickets issued by the local municipal law enforcement agency and fines collected by the mayor's court manually or electronically?	Electronic	Manually	Electronic	Electronic as of March 2004	Manually
2.	Please indicate what information you will not be able to provide and why.	Cannot break down violations by actual charges and computer system doesn't allow pulling up tickets that were referred to district court (it rarely happens). That would have to be done manually. Cannot provide revenue breakdown by violation type.	Did not answer	Did not answer	Computer system does not allow for a break down of violations.	Very difficult, if not impossible to provide the information that is requested
3.	What fiscal year does your municipality operate on?	July 1 - June 30	July 1 - June 30	Jan 1 - Dec 31	July 1 - June 30	Did not answer
4.	Number of tickets issued in FY 2004 (see question #3 for timeframe).	2,056	508	5,345	424	Did not answer
4a.	Can this number be broken down by violation type?	Yes, but only by traffic, parking, misdemeanor and local - which includes more than just traffic tickets	Yes	Yes	No	Did not answer
5.	Number of tickets issued in FY 2005 (see question #3 for timeframe).	3,247	500	5,904	1,168	Did not answer
