Independent Auditor's Report

To the Pension Administrative Committee
St. Tammany Parish Hospital
Defined Contribution Plan

Report on Financial Statements
We have audited the accompanying financial statements of St. Tammany Parish Hospital Defined Contribution Plan (the Plan) as of and for the years ended December 31, 2016 and 2015, and the related notes to the financial statements, which collectively comprise the Plan's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility
Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions
In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Plan as of and for the years ended December 31, 2016 and 2015, and the related statements of changes in fiduciary net position for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters
Required Supplementary Information
Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, beginning on page 4, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Supplementary Information
Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Plan's basic financial statements. The schedule of compensation, benefits, and other payments to agency head is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The schedule of compensation, benefits, and other payments to agency head is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of compensation, benefits, and other payments to agency head is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 23, 2017, on our consideration of St. Tammany Parish Hospital Defined Contribution Plan's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Plan's internal control over financial reporting and compliance.

LaPorte

A Professional Accounting Corporation

Metairie, LA
June 23, 2017

This discussion of the St. Tammany Parish Hospital Defined Contribution Plan's (the Plan) financial statements provides an overview and analysis of the Plan's financial position and activities for the year ended December 31, 2016. Please read it in conjunction with the Plan's financial statements and related notes.

Financial Highlights

The Plan's net position was $79.3 million and $71.0 million as of December 31, 2016 and 2015, respectively.

The net position increased by $8.3 million (or 12%) over the reported December 31, 2015 balances, and increased by $947,000 (or 1%), from December 31, 2014 to December 31, 2015. The net increases are primarily due to employer provided contributions, investment income, and net of amounts distributed to participants.

The average overall rate of return on investments for the year was a positive 8.3% on a fair value basis for the year ended December 31, 2016, compared to last year's negative 0.9%. Factors affecting the rate of return include changes in world equity markets during the last two years, and changes in the distribution of participant directed investments amongst the various fund options offered by the Plan. Overall rates of return are also affected by the amounts and timing of employer contributions and participant distributions throughout the Plan year.

The Plan's investments offered to participants consist of insurance company general account and pooled separate account funds maintained by Voya Retirement Insurance and Annuity Company (Voya).

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Plan's financial statements. The annual report is comprised of three components: 1) the Plan's financial statements, 2) the notes to the financial statements, and 3) the required supplementary information (management's discussion and analysis). The information available in each of the first two components is summarized as follows:

Financial Statements

The statement of fiduciary net position presents information on the Plan's assets, liabilities and the resulting net position held in trust for benefit of Plan participants. This statement reflects the Plan's investments at estimated fair value, along with cash and other assets and liabilities as applicable. This statement indicates the net position available to pay future benefits and gives a snapshot of the Plan's financial position at a particular point in time.

The statement of changes in fiduciary net position presents information showing how the Plan's net position held in the trust changed during the years ended December 31, 2016 and 2015. It reflects contributions by the Plan Sponsor (St. Tammany Parish Hospital), along with deductions for benefits paid to participants upon retirement or other separation of employment.

Investment income is also presented showing income from the Plan's participant directed investment choices.

Notes to Financial Statements

The notes to financial statements provide additional information that is essential to a full understanding of the data provided in the Plan's financial statements.

Financial Analysis

Total assets of the Plan were $79.3 million as of December 31, 2016, compared with $71.0 million as of December 31, 2015, and $70.0 million as of December 31, 2014. The Plan's invested assets consist principally of units of participation in *pooled separate accounts* and the Plan's *fixed general account investment,* which collectively comprise the Plan's investment contract with Voya Retirement Insurance and Annuity Company. Pooled separate accounts are similar to a common or commingled trust maintained by a bank, except that a pooled separate account is maintained by an insurance company rather than a bank. The assets underlying a pooled separate account are the insurance company's property, with each of two or more unrelated participating plan's units of participation representing rights to the assets underlying the separate account. The Plan has not reported any liabilities during 2016, 2015, and 2014.

A summary of the Plan's fiduciary net position for each of the last three years is presented below:

	December 31,		
	2016	2015	2014
Assets			
Receivables	**$ 558,549**	$ 575,613	$ 253,849
Investments at Estimated Fair Value	**78,718,947**	70,416,254	69,790,840
Total Assets	**79,277,496**	70,991,867	70,044,689
Net Position - Restricted for Pension Benefits	**$ 79,277,496**	$ 70,991,867	$ 70,044,689

A summary of the changes in fiduciary net position during the years ended December 31, 2016, 2015, and 2014 follows:

	December 31,		
	2016	2015	2014
Additions			
Employer's Contributions	**$ 4,585,101**	$ 4,410,355	$ 4,738,184
Rollover Contributions	**62,817**	5,338	138,164
Net Investment Income (Loss)	**6,229,842**	(654,567)	4,443,034
Total Additions	**10,877,760**	3,761,126	9,319,382
Deductions			
Benefits Paid to Participants	**2,592,131**	2,813,948	2,035,863
Total Deductions	**2,592,131**	2,813,948	2,035,863
Increase in Net Position	**$ 8,285,629**	$ 947,178	$ 7,283,519

The Plan's increase in net position during the Plan years ended December 31, 2016, 2015, and 2014, reflect net additions of $8.3 million, $0.9 million, and $7.3 million, respectively, which represent the Plan's net investment income or loss for those years, contributions from the Plan Sponsor, net of distributions, and other benefits paid to plan participants. For the years ended December 31, 2016, 2015, and 2014, the Plan's investments had earned income at rates comparable to those of the underlying securities and/or stated interest rates.

The Plan's changes in net position, as shown above, also reflect approximately $4.6 and $4.4 million of employer contributions in the Plan for the years ended December 31, 2016 and 2015, respectively. The employer contribution was calculated as a percentage of eligible salaries based on years of service as defined by the Plan. St. Tammany Parish Hospital experienced increases in both the number of employees and in overall salaries during the years 2014, 2015, and 2016. Net contributions decreased from 2014 to 2015 due to the effect of a graduated contribution percentage effective for employees hired after January 1, 2013. Net contributions slightly increased from 2015 to 2016 due to the effect of St. Tammany Parish Hospital's acquisition of a local health system's business department employees. Benefits paid to participants primarily include payments and rollovers of the vested account balances of participants withdrawing from participation in the Plan upon termination of employment with the Hospital, and retirement benefits. Participants who received benefit payments has fluctuated slightly in each of the last three years. The average benefit paid to participants was consistent at $34,107 and $34,316 in 2016 and 2015, respectively. This represented a slight increase in the average benefit paid in 2014 of $32,315.

Requests for Additional Information

Questions concerning any of the information provided herein or requests for additional financial information should be addressed to St. Tammany Parish Hospital Defined Contribution Plan, Administration, 1202 S. Tyler Street, Covington, LA 70433.

Note 1. Description of the Plan

The following description of the St. Tammany Parish Hospital Defined Contribution Plan (the Plan) provides only general information. Participants should refer to the Plan adoption agreement and the relevant Summary Plan Descriptions of the Plan, which are made available to all participants, for a complete description of the Plan's provisions.

General
The Plan is a noncontributory, defined contribution pension plan covering all eligible full-time and part-time employees of St. Tammany Parish Hospital Service District No. 1 (the Hospital). The Plan and Trust of which it is a part are intended to satisfy all of the requirements for a qualified retirement plan under the appropriate provisions of the Internal Revenue Code (IRC) and similar state tax laws.

Hospital service districts in Louisiana are authorized under Louisiana Revised Statute 46:1068 to establish and maintain actuarially sound pension and retirement systems making contributions from hospital service district funds. They may make contracts of insurance with any insurance company legally authorized to do business in Louisiana and may enter into other contracts and trust agreements with banks, which are incidental to creating and maintaining an actuarially sound pension and retirement system.

The Plan is classified as a governmental plan and is not subject to Title I of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan, accordingly, does not file Form 5500, which was developed by the Internal Revenue Service, Department of Labor, and the Pension Benefit Guaranty Corporation to satisfy the reporting requirements of the IRS and ERISA.

Eligibility
Employees of the Hospital who have completed the minimum requirement of one year of service are eligible to participate in the Plan. An employee is credited with one year of service for each twelve consecutive months in which the participant has completed 1,000 or more hours of service with the employer. Effective January 1, 2013 the Hospital's component unit, St. Tammany Physicians Network, Inc. (STPN) became a participating employer in the Plan.

Employees hired, or who have a change in employee status date, on or after January 1, 2013, are eligible to receive contributions if they are employed on the last day of the Plan year. Exceptions to this are those whose employment has been terminated due to death, total or permanent disability, or early or normal retirement. This condition of eligibility is not in place for those hired before January 1, 2013, and who did not terminate employment or change to an ineligible status after December 31, 2012.

Plan Membership
At December 31, 2016, plan membership consisted of 1,551 participants with invested account balances.

Note 1. Description of the Plan (Continued)

Contributions

For eligible employees hired before January 1, 2013, and who did not terminate employment or change to an ineligible status after December 31, 2012, the Plan's participating employers contribute funds equal to 6% of the aggregate compensation of those participants and 5.7% of compensation in excess of the social security wage base.

For eligible employees hired, or who have a change in employee status date, on or after January 1, 2013, the Plan's participating employers contribute funds equal to a percentage of aggregate compensation for those participants based on the following table:

Years of Service	Contribution Percentage
Less than 1	0%
1 - 4	2%
5 - 9	3.5%
10 - 14	5%
15 or more	6%

Contributions are remitted to the trustee and are invested in accordance with the provisions of the Plan. For eligible employees hired before January 1, 2013, and who did not terminate employment or change to an ineligible status after December 31, 2012, contributions are remitted in conjunction with the bi-weekly payroll periods. For eligible employees hired, or who have a change in employee status date, on or after January 1, 2013, contributions are remitted annually at the end of the plan year.

Participants direct the investment of contributions on their behalf into various investment options offered by the Plan. Participants may also rollover amounts representing distributions from other qualified defined benefit or contribution plans.

Participants' Investment Options

Investment options available to participants include a guaranteed interest account, and numerous variable equity and fixed income fund options provided through a pooled separate account arrangement.

Vesting

Employer contributions on behalf of participants are 100% vested after five years of credited service.

Participant Accounts

Income earned on investments and the net realized and unrealized appreciation in estimated fair value of investments are allocated to participants' accounts in the ratio of each participant's adjusted beginning balance to the adjusted beginning balance for all participants. The adjusted beginning balance is defined as the account balance at the beginning of the period less withdrawals, distributions, forfeitures, and other payments made during the period.

Note 2. Significant Accounting Policies

Upon retirement, death, or disability, the participant is entitled to receive the value of his or her account within 60 days after the close of the plan year in which the event occurred. The participant may elect to receive the vested portion of the account in a lump-sum distribution or in periodic payments. Terminated employees receive benefits no later than 60 days after the end of the first plan year after the break in service occurs.

Forfeitures
Forfeitures of terminated employees' non-vested account balances are applied as a reduction of employer contributions. During 2016 and 2015, employer contributions were reduced by $139,022 and $383,450, respectively, from forfeited non-vested accounts.

The balance of forfeited non-vested accounts may be used to reduce future employer contributions. At each of the years ended December 31, 2016 and 2015, there was no remaining balance of forfeited non-vested accounts.

Use of Estimates and Basis of Accounting
The financial statements are prepared in accordance with standards established by the Governmental Accounting Standards Board (GASB). These financial statements include the provisions of GASB Statement No. 34, *Basic Financial Statement and Management's Discussion and Analysis for State and Local Governments* and related standards.

The financial statements of the St. Tammany Parish Hospital Defined Contribution Plan have been prepared on the accrual basis of accounting. Employer contributions are recognized in the period in which the employee is compensated for services performed. Benefits are recognized when due and payable in accordance with the terms of the Plan. Interest and dividend income is recognized when earned. Under the Governmental Accounting Standards Board's Accounting Standards Codification the Plan's investment contract is required to be reported at fair value.

Impact of Significant Recently Issued and Adopted Accounting Pronouncements
In February 2015, GASB issued Statement No. 72, *Fair Value Measurement and Application*. This Statement addresses accounting and financial reporting issues related to fair value measurements. This Statement provides guidance for determining a fair value measurement for financial reporting purposes. This Statement also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements. This Statement is effective for financial statements for fiscal years beginning after June 15, 2015.

The Plan's adoption of this Statement in 2016 is reflected in the fair value disclosures included in Note 3.

Note 2. Significant Accounting Policies (Continued)

Investments

The Plan's investments were held by the Plan's trustee, Voya Retirement Insurance and Annuity Company (Voya). Under the terms of the trust agreement, the trustee administered the investment transactions of the Plan on behalf of the participants and has discretionary authority over the Plan's assets, which can include investing in the trustee's administered accounts. The investments and changes therein are reported at fair value as determined by the trustee.

All investments in 2016 and 2015 consisted of either fixed annuity contracts general account investments or pooled separate accounts. The accounts are managed and administered by the custodians and related entities. The custodian is responsible for calculating the per unit fair value of the respective funds' net position. Under the terms of the prospectuses, the Plan can divest itself of the investments by reselling them to the respective fund daily at a unit price equal to the per unit interest of the fair value of the funds' net position. The investments in these funds are stated at the Plan's pro rata interest in the fair value of the funds' net position.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends, when present, are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

St. Tammany Parish Hospital (the Plan Sponsor) bears most of the administrative costs of the Plan. The Trustee fees that are borne by the Plan are treated as an investment expense and are deducted from investment earnings allocated to the participants' accounts.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Note 3. Investments

The table below presents the fair value of the participant-directed investments in this Plan. Single participant directed investment options representing more than 5% of the Plan's net position are separately identified.

Plan participants may direct contributions into any of the investment options offered by the Plan, which include various Voya pooled separate accounts and a Voya general account investment. It is the Plan's policy to permit participants to establish different investment strategies, which have varying return and volatility characteristics to meet each participant's long-term retirement savings strategy.

	December 31, 2016		December 31, 2015	
Voya Retirement Insurance and Annuity Company Contract No. PH9188

* - Represents an individual investment option totaling more than 5% of the Plan's net position in the respective year.

A summary of the net appreciation (depreciation) of the Plans' investments under its contract with Voya was as follows for the years ended December 31, 2016 and 2015:

	December 31, 2016	December 31, 2015
Voya Retirement Insurance and Annuity Company Contract No. PH9188		
Pooled Separate Accounts		
Voya Retirement Insurance and Annuity Company Separate Account D	$ 5,859,997	$ (1,208,435)
Insurance Company General Account		
Voya Fixed Account - Guaranteed Interest Account	(265,142)	(34,688)
Net Appreciation (Depreciation)	$ 5,594,855	$ (1,243,123)

Note 3. Investments (Continued)

The Plans categorizes its fair value measurements within the fair value hierarchy established by accounting principles generally accepted in the United States of America. The following levels indicate the hierarchy of inputs used to measure fair value and the primary valuation methodologies used for financial instruments measured at fair value on a recurring basis:

- Level 1 - Investments whose values are based on quoted prices (unadjusted) for identical assets in active markets that a government can access at the measurement date.
- Level 2 - Investments with inputs – other than quoted prices included within Level 1 – that are observable for an asset, either directly or indirectly.
- Level 3 - Investments classified as Level 3 have unobservable inputs for an asset and may require a degree of professional judgment.

Pooled Separate Account Investments are valued at net asset value (NAV). Descriptions for each fund types are listed on the following pages.

General Account investment consists of a guaranteed interest account provided through a fixed annuity contract issued by Voya Retirement Insurance and Annuity Company. The value of the accounts is determined by the daily crediting of interest which is subject to minimum contractual guarantees. The Fixed Accounts do not have a maturity date.

The following tables reflect the plans investments by fair value level as of December 31, 2016 and 2015:

		Fair Value Measurements Using		
	December 31, 2016	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments by Fair Value Level				
Unallocated Insurance Contracts:				
Depostit Administration Contract	$ 20,520,524	$ -	$ 20,520,524	$ -
Total Investment by Fair Value Level	20,520,524	$ -	$ 20,520,524	$ -
Investments Measured at Net Asset Value (NAV)

Note 3. Investments (Continued)

(1) Emerging Markets Equity Funds – This category invests the majority of its assets in the financial markets of a single developing country or a group of developing countries. For the most part, these countries are in Eastern Europe, Africa, the Middle East, Latin America, the Far East and Asia.

(2) Large Cap Equity Funds – This category invests in large U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). Most of these portfolios focus on companies in rapidly expanding industries.

(3) Mid Cap Equity Funds – This Category seeks capital appreciation through long-term investments primarily in securities of companies with undervalued assets or favorable growth prospects. The Fund invests for the long term primarily in equity securities in the form of common stock of medium-sized growth companies.

(4) Small Cap Equity Funds – This category seeks capital appreciation by investing primarily in common stocks. It invests at least 80% of its assets in securities of companies with small market capitalizations.

(5) Global Bond Funds – This category invests in debt obligations of companies located anywhere in the world, including the investor's own country. These funds provide more global opportunities for diversification and act as a hedge against inflation and currency risks.

(6) Growth Funds - This category invests in a diversified portfolio of stocks that has capital appreciation as its primary goal, with little or no dividend payouts.

(7) Growth and Income Funds – This category has a dual strategy of capital appreciation and current income generation through dividends or interest payments. A growth and income fund may invest only in equities or in a combination of stocks, bonds, real estate investment trusts and other securities.

(8) High Yield Bond Funds – This category invests in a diversified portfolio of high-yield (high risk) bonds commonly known as "junk bonds." High-yield bonds are debt securities that, at the time of purchase, are not rated by a nationally recognized statistical rating organization (NRSRO) or are rated below investment-grade or have an equivalent rating by a NRSRO.

(9) Income Funds – This category emphasizes current income, either on a monthly or quarterly basis, as opposed to capital appreciation. Such funds usually hold a variety of government, municipal and corporate debt obligations, preferred stock, money market instruments, and dividend-paying stocks.

(10) Intermediate Term Bond Funds – This category seeks to invest in basket of intermediate or medium term bonds, often diversifying the holdings in different types of bonds: government, corporate, high-yield, muni bonds, asset-backed securities, mortgage-backed securities.

Note 3. Investments (Continued)

(11) Lifestyle Funds – Investment funds in this category feature an asset mix determined by the level of risk and return that is appropriate for an individual investor. Factors that determine this mix include an investor's age, level of risk aversion, the investment's purpose and the length of time until the principal will be withdrawn. Lifestyle funds can feature conservative, moderate or aggressive growth strategies. Aggressive growth lifestyle funds are targeted to investors in their late 20s, while conservative growth lifestyle funds are targeted to investors in their late 50s. Lifestyle funds are designed to be the main investment in a person's portfolio.

(12) Multisector Bond Funds – This category seeks income by diversifying assets among several fixed-income sectors, usually U.S. government obligations, U.S. corporate bonds, foreign bonds, and high-yield U.S. debt securities. These portfolios typically hold 35% to 65% of bond assets in securities that are not rated or are rated by a major agency such as Standard & Poor's or Moody's at the level of BB (considered speculative for taxable bonds) and below.

(13) World Stock Funds – This category invests in securities from several different countries, including the United States. World funds typically have a significant portion of their capital invested in U.S.-listed securities, but also spread their investment capital among securities from several other countries. This structure limits exposure to any specific country and limits exchange rate risks.

Authorized Investments

Hospital service districts are authorized under Louisiana R.S. 46:1068 to establish and maintain actuarially sound pension and retirement plans making contributions from hospital service district funds. They may make contracts of insurance with any insurance company legally authorized to do business in Louisiana and may enter into other contracts and Trust Agreements with banks, which are incidental to creating and maintaining an actuarially sound pension and retirement system. At December 31, 2016 and 2015, the Plan's investments were held by Voya Retirement Insurance and Annuity Company. The state statutes authorize the Plan to invest in direct obligations of the U.S. Treasury and other federal agencies, time deposit with state and national banks having their principal office in the State of Louisiana, guaranteed investment contracts issued by highly rated financial institutions, and certain investments with qualifying mutual or trust fund institutions. Louisiana statutes also require that all of the deposits of the Plan, when present, be protected by insurance or collateral. The market value of collateral pledged must equal or exceed 100% of the deposits not covered by insurance. The Plan’s carrying amount of cash deposits was $-0- as of December 31, 2016 and 2015.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The Plan’s pooled separate account investments have no maturity date. The Plan’s insurance company general account investment (Voya Fixed Account investment) similarly, has no specific maturity dates. The Voya Fixed Account guarantees principal and a minimum guaranteed interest rate for the life of the investment and features two declared interest rates: a current rate, determined at least monthly, and a guaranteed

Note 3. Investments (Continued)

Interest Rate Risk (Continued)

minimum floor rate declared for a defined period - currently one calendar year. The guaranteed minimum floor rate may change after the end of the defined period, but it will never be lower than the minimum guaranteed rate. The current rate, the guaranteed minimum floor rate and the minimum guaranteed interest rate are expressed as annual effective yields.

Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. As of December 31, 2016, the Plan's investments in Voya Retirement Insurance and Annuity Company were rated A by Standard & Poor's and A2 by Moody's Investors Service.

Concentration of Credit Risk

The Plan's investment policy seeks to maximize participant diversification opportunities to reduce overall portfolio risk while generating growth of asset value. The Plan places no limit on the amount that may be invested with one issuer. The amount of the Plan's funds allocated to the Voya Fixed Account discussed above is held in Voya's general account which supports insurance and annuity obligations. The safety of the interest rate guaranteed under the contract is dependent on Voya's claims paying ability.

The Plan's funds allocated to the Voya Retirement Insurance and Annuity Company Separate Account D will not be charged with liabilities arising out of any other business Voya may conduct, but obligations of the account, including the promise to make benefit payments, are obligations of Voya. As of December 31, 2016, the Plan's investments consisted solely of the aforementioned Voya general account and Voya pooled separate account investments. As of December 31, 2016, the Plans total investment composition was as follows:

Voya Retirement Insurance and Annuity Company,		
Pooled Separate Account D Funds	$ 58,198,423	74%
General Account Funds	20,520,524	26%
Total Invested Assets	$ 78,718,947	100%

Custodial Credit Risk

Custodial credit risk is the risk that in the event of financial institution failure, the Plan's deposits may not be returned to it. The Plan's invested funds represent direct contractual investments and are not considered securities exposed to custodial credit risk.

Note 4. Investment Contract with Insurance Company

The Plan's investment contract with Voya is fully benefit-responsive. Voya maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

Because the guaranteed investment contract is fully benefit-responsive, participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. Contract value, as reported to the Plan by Voya, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses.

There are no reserves against the reported value for credit risk of the contract issuer or otherwise. The crediting interest rate and average yield for the Plan's Voya Fixed Account investment was 3.10% and 3.15% for 2016 and 2015, respectively. The crediting interest rate is based on a formula agreed upon with the issuer, but may not be less than 2.80% as of December 31, 2016. Such interest rates are reviewed on a periodic basis for resetting.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under Employee Retirement Income Security Act of 1974. The Plan Administrator does not believe that occurrence of any such value event, which would limit the Plan's ability to transact at contract value with participants, is probable.

The guaranteed investment contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

Note 5. Plan Termination

Although the Plan Sponsor has not expressed any intent to do so, the Plan Sponsor has the right to modify, suspend, or discontinue contributions to the Plan at any time, and such action shall not be deemed to be a termination of the Plan.

In the event the Plan terminates, the balance in each participant's or retired participant's account shall immediately become fully vested and non-forfeitable. Each participant, retired participant, or beneficiary shall be entitled to receive any amounts then credited to his or her account.

Note 6. Income Tax Status

The Internal Revenue Service has ruled that the Plan qualifies under Section 401(a) of the Internal Revenue Code (IRC) and is, therefore, not subject to tax under present income tax law. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Pension Administrative Committee is not aware of any course of action or series of events that have occurred that might adversely affect the Plan’s qualified status.

Note 7. Related Party Transactions

Plan investments include units of funds managed by Voya. Voya is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions.

OTHER SUPPLEMENTARY INFORMATION

ST. TAMMANY PARISH HOSPITAL
DEFINED CONTRIBUTION PLAN
Schedule of Compensation, Benefits, and Other Payments to Agency Head
For the Year Ended December 31, 2016

The Plan is sponsored by St. Tammany Parish Hospital. During the year ended December 31, 2016, the Plan had no employees and accordingly there was no compensation, benefits, or other such payment that met the reporting requirement for purposes of this schedule.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Independent Auditor's Report

To the Pension Administrative Committee
St. Tammany Parish Hospital
Defined Contribution Plan

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the accompanying statements of St. Tammany Parish Hospital Defined Contribution Plan (the Plan) as of and for the year ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the Plan's basic financial statements and have issued our report thereon dated June 23, 2017.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Plan's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we do not express an opinion on the effectiveness of the Plan's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters
As part of obtaining reasonable assurance about whether the Plan's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report
The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Plan's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Plan's internal control and compliance. Accordingly, this communication is not suitable for any other purpose. Under Louisiana Revised Statute 24:513, this report is distributed by the Legislative Auditor as a public document.
