

LOUISIANA DEPARTMENT OF WILDLIFE & FISHERIES

SEAFOOD TESTING SAMPLING PROTOCOL

LDWF CONTACTS:

Program Administration & Development:

Joe Shepard, Fisheries Administrator
2000 Quail Drive, Baton Rouge, LA 70809-9000
Work: 225-765-2474
Email: jshepard@wlf.la.gov

Program Implementation:

Harry Blanchet, Marine Fisheries Director
2000 Quail Drive, Baton Rouge, LA 70809-9000
Work: 225-765-2889
Email: hblanchet@wlf.la.gov

Program Coordination:

Denise Kinsey, Marine Fisheries Biologist Supervisor
2000 Quail Drive, Baton Rouge, LA 70809-9000
Work: 225-765-2889
Email: dkinsey@wlf.la.gov

TISSUE HANDLING, STORAGE AND SHIPPING PROCEDURES:

- A sample is composed of a single species except for shrimp where it is acceptable to combine species if necessary.
- If the need arises to remove loose dirt or debris from a sample, rinse with water from the harvest location.
- Each sample must be from a specific site (See Definition of Site). Tissue from different sites must NOT be combined to make up a sample.
- A sample must contain a minimum of 200-300 grams (~1/2 lbs.) of edible flesh. Where possible all samples should remain intact and whole. For large species, a single sample of 1,300 – 2,200 grams (~4 lbs.) should be taken from the caudal peduncle region from behind the anus to the tail (See Illustration 1). The sample should entail making 2 clean cuts and should avoid cutting into the body cavity. Clean processing procedures (See Definition of Clean Processing Procedures) must be followed when collecting a tissue sample to avoid contamination.
- Finfish and crabs should be wrapped individually. Shrimp should be combined and wrapped as one sample. Samples must be wrapped in a double layer of heavy-duty aluminum foil (dull side touching sample) in the field if possible.

- Samples should be enclosed in a sealable plastic bag and placed immediately in an ice slush bath to cool down as quickly as possible. Prevent samples from coming in contact with melted water. Samples should be kept at 4 °C (39 °F) or below for no more than a 24 hour period of time before freezing. As soon as possible after collection, samples should be maintained in a frozen state at least -20 °C (-4 °F) or lower and remain frozen until placed in DHH custody.
- A label uniquely identifying the sample must be placed in the bag along with each sample (See Definition of Unique Identifier).
- A chain of custody form (Appendix I) must be completed for each sample, and must follow the sample until delivered to the DHH lab.
- When shipping, samples should be double bagged (i.e. whirl-pac™, zip-loc™, etc); expel almost all air from the bag (e.g.: push sides of bag completely then hold before closing).
- Samples should be transferred in a clean insulated shipping containers, i.e. disposable Styrofoam cooler may be preferred to new cooler.
- LDWF and DHH will each provide a contact that will coordinate sample transfer and receipt. Samples delivery will be restricted to Monday through Friday 8:00 AM-4:30 PM unless other arrangements are agreed upon by the coordinators. Samples will be delivered to the LDHH Laboratory at 3101 West Napoleon Avenue, Metairie, Louisiana, 70001; Phone 505-219-4664; 24/7 emergency number 504-458-9537 unless other arrangements are agreed upon by the coordinators.

WATER & SEDIMENT HANDLING PROCEDURES:

- A sample of water or sediment will be a composite of a minimum of three grabs (aliquots).
- Sediment samples will be collected using equipment designed to targeting the top 2-4 inches of the sediment layer. Samples will be composited in a stainless steel bucket, and placed in wide-mouth glass jars approximately one quart in volume or otherwise as required by the DHH laboratory.
- Water samples will be collected at three depths throughout the water column at each site (subsurface, mid-depth, above bottom). Samples must be collected in non-plastic containers of one quart volume or as required by the laboratory.
- Water and sediment samples will be collected and shipped for analyses to the DHH lab for analysis.
- A DEQ chain of custody form must be completed for each sample, and must follow the sample until delivered to the DHH lab.
- LDWF and DHH will each provide a contact that will coordinate sample transfer and receipt. Samples delivery will be restricted to Monday through Friday 8:00 AM-4:30 PM unless other arrangements are agreed upon by the coordinators. Samples will be delivered to the LDHH Laboratory at 3101 West Napoleon Avenue, Metairie, Louisiana, 70001; Phone 505-219-4664; 24/7 emergency number 504-458-9537 unless other arrangements are agreed upon by the coordinators.

SEAFOOD SAMPLED AND SAMPLE FREQUENCY:

- Inshore tissue samples will be collected monthly from each of 5 drainage basins (See Definition for Drainage Basins) for Inshore Shrimp/Crab (10 samples) and Inshore Fish (35 samples) for a total of **45** tissue samples (Figure 1). Monthly sample collection will vary depending on the availability of those species in inshore waters. Fish species sampled will be based on the seasonal occurrence of fish species in the recreational and commercial harvest. Sample sites for tissue collection will alternate among existing resource monitoring standardize sampling sites in an attempt to maximize spatial coverage throughout each basin. The intent is to obtain a representative sample of each species based on its range throughout the estuarine system.
- Nearshore tissue samples will be collected monthly from 1 of 3 nearshore sampling zones for Nearshore Shrimp (32 samples) (Figure 2). A full set of samples for the coast of Louisiana will be collected each quarter. Site selection will follow the standardized protocol of the department's nearshore resource monitoring project. Two sets of Nearshore Reef Fish (36 samples) and Nearshore Pelagic Fish (30 samples) will be collected monthly. Sites will be selected to best represent areas of greatest recreational and commercial fishing activity. A total of **98** tissue samples will be collected monthly for processing. Monthly sample collection will vary depending on the availability of those species in nearshore waters. Fish species sampled will be based on the seasonal occurrence of fish species in the recreational and commercial harvest.

NEARSHORE WATER & SEDIMENT SAMPLES:

- Nearshore water samples will be collected from 1 of 3 nearshore sampling zones monthly in conjunction with the collection of Nearshore Shrimp (32 samples) tissues samples. Sediment samples will be collected annually (8/month – 96/year) from each of 3 nearshore sampling zones in conjunction with the collection of Nearshore Shrimp tissue samples. A total of **40** samples will be collected monthly (Figure 2).

DEFINITIONS:

INSHORE SHRIMP/CRAB – BLUE CRAB, WHITE AND/OR BROWN SHRIMP (COMPOSITE SAMPLE)

NEARSHORE SHRIMP - WHITE AND/OR BROWN SHRIMP (COMPOSITE SAMPLE)

INSHORE FISH - SPOTTED SEATROUT, RED DRUM, SOUTHERN FLOUNDER, GULF MENHADEN, STRIPED MULLET, BLACK DRUM, SHEEPSHEAD

NEARSHORE REEF FISH - SNAPPER, GROUPER, AMBERJACK, CROAKER, SAND/SILVER SEATROUT, COBIA

NEARSHORE PELAGIC FISH - TUNA, WAHOO, DOLPHIN, KING MACKEREL, SPANISH MACKEREL

CLEAN PROCESSING PROCEDURES – SAMPLES MUST AT ALL COST AVOID CONTAMINATION FROM THE COLLECTION PROCESS. EQUIPMENT MUST BE CLEANED BETWEEN SAMPLES, AVOID EQUIPMENT COMING INTO CONTACT WITH FOSSIL FUELS OR THEIR DERIVATIVES. LIMIT FIELD EXPOSURE TO PETROLEUM PRODUCTS DURING HARVEST, INCLUDING ENGINE EXHAUST FROM THE HARVEST VESSEL. ENSURE THAT THE SAMPLE IS NOT TOUCHED BY PLASTIC PRODUCTS TO LIMIT POTENTIAL PETROLEUM TRANSFER. USE CLEAN WATER TO RINCE EQUIPMENT.

DRAINAGE BASINS – THE BASINS WILL BE IDENTIFIED AS:

LP - LAKE PONTCHARTRAIN (INCLUDES THE MISSISSIPPI DELTA EAST OF SOUTH PASS)
 BB - BARATARIA (INCLUDES THE MISSISSIPPI DELTA WEST OF SOUTH PASS)
 TB - TERREBONNE
 AV - ATCHAFALAYA & VERMILLION-TECHE
 CS - CALCASIEU & SABINE

UNIQUE IDENTIFIER

- **INSHORE SHRIMP/CRAB AND INSHORE FISH** - THE UNIQUE IDENTIFIER WILL BE THE 2 CHARACTER BASIN CODE FOLLOWED BY THE 4 DIGIT YEAR THE SAMPLE WAS COLLECTED FOLLOWED BY A SEQUENTIAL NUMBER STARTING WITH 1 FOR THE FIRST SAMPLE EACH YEAR. FOR EXAMPLE: THE FIRST TISSUE SAMPLE COLLECTED FROM THE LAKE PONTCHARTRAIN BASIN FOR 2011 WOULD BE "LP20111". EACH COASTAL STUDY AREA WILL BE RESPONSIBLE FOR TRACKING UNIQUE IDENTIFIERS FOR THEIR AREA OF RESPONSIBILITY.

CSA1 – LAKE PONTCHARTRAIN BASIN
 CSA3 – BARATARIA BASIN
 CSA4 – TERREBONNE BASIN
 CSA6 – ATCHAFALAYA & VERMILLION-TECHE BASIN
 CSA7 – CALCASIEU & SABINE BASIN

- **NEARSHORE SHRIMP** – THE UNIQUE IDENTIFIER WILL BE A CODE FOR THE GRAND ISLE FISHERIES RESEARCH LAB (FL) FOLLOWED BY THE 4 DIGIT YEAR THE SAMPLE WAS COLLECTED FOLLOWED BY A SEQUENTIAL NUMBER STARTING WITH 1 FOR THE FIRST SAMPLE EACH YEAR. FOR EXAMPLE: THE 35TH SAMPLE COLLECTED BY THE FISHERIES RESEARCH LAB DURING 2011 WOULD BE "FL201135". THE FISHERIES RESEARCH LAB IS RESPONSIBLE FOR TRACKING UNIQUE IDENTIFIERS FOR THE NEARSHORE SHRIMP TISSUE SAMPLES.
- **NEARSHORE REEF FISH AND NEARSHORE PELAGIC FISH** – THE UNIQUE IDENTIFIER WILL BE A CODE FOR THE SEAFOOD SAFETY SAMPLING TEAM (ST) FOLLOWED BY THE 4 DIGIT YEAR THE SAMPLE WAS COLLECTED FOLLOWED BY A SEQUENTIAL NUMBER STARTING WITH 1 FOR THE FIRST SAMPLE EACH YEAR. FOR EXAMPLE: THE 145TH SAMPLE COLLECTED BY THE SEAFOOD SAFETY SAMPLING TEAM DURING 2011 WOULD BE "ST2011145". THE SEAFOOD SAFETY SAMPLING TEAM IS RESPONSIBLE FOR TRACKING UNIQUE IDENTIFIERS FOR THE NEARSHORE REEF AND PELAGIC FISH TISSUE SAMPLES.

SITE – THE GENERAL AREA WHERE YOUR GEAR IS DEPLOYED. SITE CAN VARY IN SIZE BASED ON THE GEAR USED. THE INTENT IS TO COLLECT A SAMPLE AS CLOSE AS POSSIBLE TO A SPECIFIC GEOGRAPHIC POINT (LATITUDE AND LONGITUDE). THE DATUM USED TO GET THE LATITUDE AND LONGITUDE MUST BE NAD 83 AND RECORDED IN DECIMAL DEGREES.
