Independent Auditors' Report

Board of Commissioners
St. Tammany Parish Fire Protection District No. 6
Covington, Louisiana

We have audited the accompanying financial statements of the governmental activities and the major fund of St. Tammany Parish Fire Protection District No. 6 (the District), a component unit of St. Tammany Parish, Louisiana, as of and for the year ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions. Our responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance that there are no material modifications that should be made to the financial statements. We believe that the results of our procedures provide a reasonable basis for our report.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and the major fund of the District as of December 31, 2016, and the respective changes in financial position for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the supplementary schedules required by GASB Statement No. 68 on pages 23 to 25 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board (GASB), who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis information that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's financial statements as a whole. The accompanying information listed as other supplementary information in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The schedule of governing board and the schedule of compensation, benefits, and other payments to agency head are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated April 20, 2017, on our consideration of St. Tammany Parish Fire Protection District No. 6's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the District's internal control over financial reporting and compliance.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

(1) Summary of Significant Accounting Policies

(a) Introduction

The St. Tammany Parish Fire Protection District No. 6 (the District) was created on September 17, 1970 by St. Tammany Parish Police Jury, as provided by Louisiana Revised Statute 40:1492. The District was created to acquire, maintain, and operate buildings, machinery, equipment, water tanks, water hydrants and water lines, and other such things necessary to provide proper fire prevention and control within the District's limits. The administration of the District is governed by a board of commissioners consisting of 5 members who are resident property taxpayers of the district. These members are appointed by the St. Tammany Parish Police Jury and serve 2 years without remuneration. The District operates three fire stations and provides fire protection services in an area covering approximately 55 square miles.

The accounting policies of the District conform to accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The following is a summary of significant accounting policies:

(b) Basis of Presentation

Government-Wide Financial Statements:

The government-wide financial statements include the statement of net position and statement of activities for all of the non-fiduciary activities of the District. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which are financed to a significant extent by fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*. There were no program revenues for the year ended December 31, 2016.

Fund Financial Statements:

The fund financial statements are very similar to the traditional government fund statements as presented by governments prior to the issuance of GASB Statement No. 34. Emphasis is now on the major funds in either the governmental or business-type categories. Non-major funds (by category) or fund type are summarized into a single column. The District has no non-major funds.

The daily accounts and operation of the District continue to be organized on the basis of funds, each of which is considered a separate accounting entity. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain functions or activities. The operations of each fund are accounted for with a separate set of self-

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

balancing accounts that comprise assets, liabilities, equity, revenues, and expenditures, or expenses, as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purpose for which they are to be spent and the means by which spending activities are controlled.

The district reports only one governmental fund and it represents the major governmental fund:

The *General Fund* is the principal fund of the District and is used to account for all activities except those required to be accounted for in other funds.

Management's Discussion and Analysis:

The Governmental Accounting Standards Board Statement requires a Management's Discussion and Analysis (MD&A) section providing an analysis of the District's overall financial position and results of operations and financial statements prepared using full accrual accounting for all of the District's activities. The District has not presented Management's Discussion and Analysis that the Governmental Accounting Standards Board has determined necessary to supplement, although not required to be part of, the basic financial statements.

(c) Reporting Entity

The District is a component unit of St. Tammany Parish Consolidated Government (the Parish) and as such, these financial statements will be included in the Comprehensive Annual Financial Report (CAFR) of the Parish for the year ended December 31, 2016.

The District has reviewed all of its activities and determined that there are no potential component units which should be included in its financial statements.

(d) Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Measurement focus is a term used to describe "which" transactions are recorded within the various financial statements. Basis of accounting refers to "when" transactions are recorded regardless of the measurement focus applied.

Government-wide Financial Statements:

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized in the year for which they are levied.

Fund Financial Statements:

All governmental funds are accounted for using a current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (revenues and other financing sources) and decreases (expenditures and other uses) in net current assets. Governmental funds are maintained on the modified accrual basis of accounting.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

Governmental fund revenues resulting from exchange transactions are recognized in the fiscal year in which the exchange takes place and meets the government's availability criteria (susceptible to accrual). Available means that the resources will be collected within the current year or are expected to be collected soon enough thereafter to be used to pay liabilities of the current year. For this purpose, the District considers revenues to be available if they are collected within 60 days of the end of the current fiscal year. Ad valorem taxes and the related state revenue sharing (Intergovernmental revenue) are recognized as revenue in the year the taxes are assessed. Ad valorem taxes are assessed on a calendar year basis, become due on November 15 of year, and become delinquent on December 31. The taxes are generally collected in December of the current year and January and February of the ensuing year. Miscellaneous revenues are recorded as revenues when received in cash by the District because they are generally not measurable until actually received.

Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred. An exception to this general rule is principal and interest on general long-term debt which is recognized when due. Allocations of cost such as depreciation are not recognized in governmental funds.

The District has adopted the provisions of GASB Statement No. 54 *Fund Balance Reporting and Government Fund Type Definitions*, which changed the reporting of fund balance in the balance sheets of governmental fund types. In fund financial statements, fund balance for governmental funds is reported in classifications that comprise a hierarchy primarily on the extent to which the district is bound to honor constraints on the specific purpose for which amounts in the funds can be spent. Fund balance is reported in five components - nonspendable, restricted, committed, assigned and unassigned.

- *Nonspendable* – This component consists of amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact.
- *Restricted* – This component consists of amounts that have constraints placed on them either externally by third-parties (creditors, grantors, contributions, or laws or regulations of other governments) or by law through constitutional provisions or enabling legislation. Enabling legislation authorizes the District to assess, levy, change or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement (compelled by external parties) that those resources be used only for the specific purposes stipulated in the legislation.
- *Committed* – This component consists of amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the District. Those committed amounts cannot be used for any other purpose unless the District removes or changes the specified use by taking the same type of action (ordinance or resolution) it employed previously to commit those amounts.
- *Assigned* – This component consists of amounts that are constrained by the District's intent to be used for specific purposes, but neither restricted nor committed. The authority for assigning fund balance is expressed by the District or the designee as established in the District's Fund Balance Policy.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

- *Unassigned* – This component consists of amounts that have not been restricted, committed, or assigned to specific purposes within the general fund. When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources (committed, assigned, and unassigned) are available for use. It is the District's policy to use committed resources first, then assigned, and the unassigned as they are needed.

(c) Operating Budgetary Data

As required by the Louisiana Revised Statute 39:1303, the Board of Commissioners (the Board) adopted a budget for the District's General Fund. The budgetary practices include public notice of the proposed budget, public inspection of the proposed budget and public hearing on the budget prior to adoption. Any amendment involving the transfers of monies from one function to another or increases in expenditures must be approved by the Board. The District amended its budget once during the year. All budgeted amounts which are not expended, or obligated through contracts, lapse at the year end.

The General Fund budget is adopted on a basis materially consistent with accounting principles generally accepted in the United States of America and is included in the budget presentation in the basic financial statements.

(f) Assets, Liabilities, and Net Assets

Cash and Cash Equivalents

Cash included amounts in interest bearing demand deposits. Under state law, the District may deposit funds in demand deposits, interest bearing demand deposits, money market accounts, or banks having their principal offices in Louisiana.

The financial statements for the District contain no allowance for uncollectible accounts. Uncollectible amounts due for ad valorem taxes are recognized as bad debts at the time information becomes available which would indicate the uncollectibility of the particular receivable. These amounts are not considered to be material in relation to the financial position or operations of the fund.

Capital Assets

The accounting treatment over property, plant and equipment (capital assets) depends on whether the assets are reported in the government-wide or fund financial statements.

Government-wide Financial Statements:

In the government-wide financial statements, fixed assets are accounted for as capital assets. Capital assets purchased or acquired with an original cost of \$500 or more are valued at historical cost or estimated historical cost if actual is unavailable, except for donated capital assets which are recorded at their estimated fair value at the date of donation. Additions, improvements and other capital outlays that significantly extend the useful life of an asset are capitalized. Other costs incurred for repairs and maintenance is expensed as incurred.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

Depreciation of all exhaustible capital assets is recorded as an expense in the Statement of Activities, with accumulated depreciation reflected in the Statement of Net Assets. Depreciation is provided over the assets' estimated useful lives using the straight-line method of depreciation. The range of estimated useful lives by type of asset is as follows:

Buildings	40 years
Furniture and equipment	5-10 years
Vehicles	15 years

Fund Financial Statements:

In the fund financial statements, capital assets used in governmental fund operations are accounted for as capital outlay expenditures of the governmental fund upon acquisition.

Fund Equity

Government-wide Financial Statements:

Equity is classified as net assets and displayed in three components:

1. **Invested in capital assets, net of related debt** – Consists of capital assets including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.
2. **Restricted net assets** – Consists of net assets with constraints placed on the use either by (1) external groups such as creditors, grantors, contributions, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation.
3. **Unrestricted net assets** – All other net assets that do not meet the definition of “restricted” or “invested in capital assets, net of related debt”.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed. As of December 31, 2015 and for the year then ended, the District did not have or receive restricted net assets.

Fund Financial Statements:

Governmental fund equity is classified as fund balance. Fund balance is further classified as reserved and unreserved, with unreserved further split between designated and undesignated.

Long-Term Debt

The accounting treatment of long-term debt depends on whether they are reported in the government-wide or fund financial statements.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

Government-wide Financial Statements - All long-term debt to be repaid from governmental resources is reported as liabilities in the government-wide statements. The long-term debt consists of general obligation bonds.

Fund Financial Statements - Long-term debt for governmental funds is not reported as liabilities in the fund financial statements. The debt proceeds are reported as other financing sources and payments of principle and interest reported as expenditures.

(g) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the report amounts and disclosures. Accordingly, actual results could differ from those estimates.

(2) Deposits and Investments

Louisiana state law allows all political subdivisions to invest excess funds in obligations of the United States, certificates of deposit of any bank domiciled or having a branch office in the state of Louisiana or any other federally insured investment.

Bank Deposits:

State law requires deposits (cash and certificates of deposit) of all political subdivisions to be fully collateralized at all times. Acceptable collateralization includes FDIC insurance and the market value of securities purchased and pledged to the political subdivision. Obligations of the United States, the State of Louisiana and certain political subdivisions are allowed as security for deposits. Obligations furnished as security must be held by the political subdivision or with an unaffiliated bank or trust company for the account of the political subdivision.

Cash and deposits are categorized into three categories of credit risk.

Category 1 includes deposits covered by federal depository insurance or by collateral held by the district or its agent in the District's name.

Category 2 includes deposits covered by collateral held by the pledging financial institution's trust department or its agent in the District's name.

Category 3 includes deposits covered by collateral held by the pledging financial institution or its trust department or agent but not in the District's name and deposits which are uninsured and collateralized.

The year end balances of deposits are as follows:

	<u>Bank Balances Category</u>			<u>Book</u>
	<u>1</u>	<u>2</u>	<u>3</u>	<u>Balance</u>
Cash	<u>\$ 342,014</u>	<u>-</u>	<u>-</u>	<u>327,892</u>

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

At December 31, 2016, the district held cash (bank balance) of \$342,014 in interest bearing demand deposits. These deposits were fully secured from risk by FDIC insurance.

(3) Due from Governmental Units

Amounts due from governmental units as of December 31, 2016 are as follows:

Property taxes	\$ 459,503
State revenue sharing	<u>12,863</u>
	<u>\$ 472,366</u>

(4) Property Taxes

Property taxes are levied each November 1st on the assessed value listed as of prior January 1st for all real property, merchandise, and movable property located in the Parish. Assessed values are established by the St. Tammany Parish Assessor's Office and the State Tax Commission at percentages of actual value as specified by Louisiana law. A reevaluation of all property is required to be completed no less than every four years. Taxes are due and payable December 31st with interest being charged on payments after January 1st. Taxes can be paid through the tax sale date, which is the last Wednesday in June. Properties for which taxes have not been paid are sold for the amount of the taxes. The tax rate for the year ended December 31, 2016 was \$20.12 per \$1,000 of assessed valuation on property within the District for the purpose of constructing, maintaining, and operating fire protection facilities within the District and paying the cost of obtaining water for fire protection purposes.

(5) Capital Assets

Capital assets and depreciation activity as of and for the year ended December 31, 2016 for the primary government is as follows:

	Balance January 1, 2016	Increases	Decreases	Balance December 31, 2016
Governmental Activities				
Capital Assets Not Being Depreciated				
Land	\$ 52,277	-	-	<u>52,277</u>

Total Governmental Activities	<hr/>	(57,454)	-	<hr/>
	\$ 699,243			641,789

The District recorded \$67,454 of depreciation expense on its capital assets for the year ended December 31, 2016.

(6) Accounts Payable and Accrued Expenditures

Accounts payable and accrued expenditures at December 31, 2016 consisted of the following:

Vendors	\$ <u>1,414</u>
---------	-----------------

(7) Pension Plan

Plan Description

The Firefighters' Retirement System is the administrator of a cost-sharing multiple-employer plan. Membership in the System is a condition of employment for any full-time firefighters who earn at least \$375 per month and are employed by any municipality, parish, or fire protection district of the State of Louisiana in addition to employees of the Firefighters' Retirement System. The System provides retirement benefits for their members. The projections of benefit payments in the calculation of the total pension liability includes all benefits to be provided to current active and inactive employees through the System in accordance with benefit terms and any additional legal agreements to provide benefits that are in force at the measurement date.

Benefit provisions are authorized within Act 434 of 1979 and amended by LRS 11:2251-11:2272. The following is a brief description of the plan and its benefits and is provided for general information purposes only. Participants should refer to the appropriate statutes for more complete information. Any person who becomes an employee as defined in RS 11:2252 on and after January 1, 1980 shall become a member as a condition of employment.

No person who has attained age fifty or over shall become a member of the System, unless the person becomes a member by reason of a merger or unless the System received an application for membership before the applicant attained the age of fifty. No person who has not attained the age of eighteen years shall become a member of the System.

Any person who has retired from service under any retirement system or pension fund maintained basically for public officers and employees of the state, its agencies or political subdivisions, and who is receiving retirement benefits therefrom may become a member of this System, provided the person

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

meets all other requirements for membership. Service credit from the retirement system or pension plan from which the member is retired shall not be used for reciprocal recognition of service with this System, or for any other purpose in order to attain eligibility or increase the amount of service credit in this System.

Deferred Retirement Option Plan

After completing 20 years of creditable service and age 50 or 25 years at any age, a member may elect to participate in the deferred retirement option plan (DROP) for up to 36 months.

Upon commencement of participation in the deferred retirement option plan, employer and employee contributions to the System cease. The monthly retirement benefit that would have been payable is paid into the deferred retirement option plan account. Upon termination of employment, a participant in the program shall receive, at his option, a lump-sum payment from the account or an annuity based on the deferred retirement option plan account balance in addition to his regular monthly benefit. If employment is not terminated at the end of the 36 months, the participant resumes regular contributions to the System. No payments may be made from the deferred retirement option plan account until the participant retires.

Initial Benefit Option Plan

Effective June 16, 1999, members eligible to retire and who do not choose to participate in DROP may elect to receive, at the time of retirement, an initial benefit option (IBO) in an amount up to 36 months of benefits, with an actuarial reduction of their future benefits. Such amounts may be withdrawn or remain in the IBO account earning interest at the same rate as the DROP account.

Contributions:

Employer contributions are actuarially determined each year. For the year ended June 30, 2015, employer and employee contributions for members above the poverty line were 27.25% and 10.0%, respectively. The employer and employee contribution rates for those members below the poverty line were 29.25% and 8.0%, respectively.

Non-employer contributions

The System also receives insurance premium tax monies as additional employer contributions. The tax is considered support from a non-contributing entity and appropriated by the legislature each year based on an actuarial study. Non-employer contributions are recognized as revenue during the year ended June 30, 2015 and were excluded from pension expense. Nonemployer contributions received by the System during the year ended June 30, 2016 was \$24,825,521 of which the District's allocable share was \$10,641.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2016, the District reported a liability of \$280,370 for its proportionate share of the Net Pension Liability. The Net Pension Liability was measured as of June 30, 2016 and the total pension liability used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date. The District's proportion of the Net Pension Liability was based on a projection of the District's

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined. At June 30, 2016, the District's proportion was 0.04286%, which was a decrease of 0.01198% from its proportion measured as of June 30, 2015.

For the year ended December 31 2016, the District recognized pension expense of \$44,426 less employer's amortization of change in proportionate share and differences between employer contributions and proportionate share of contributions of \$8,101.

At December 31, 2016, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Differences between expected and actual experience	\$ -	(11,098)
Changes in assumptions	2,416	(78)
Net difference between projected and actual earnings on pension plan investments	67,382	-
Changes in proportion and differences between Employer contributions and proportionate share of contributions	73,801	(141,312)
Employer contributions subsequent to measurement date	<u>10,339</u>	<u>-</u>
	<u>\$ 153,938</u>	<u>(152,488)</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended:

December 31, 2017	\$ 17,481
December 31, 2018	\$ 7,142
December 31, 2019	\$ 11,374
December 31, 2020	\$ 1,997
December 31, 2021	\$ (27,584)
December 31, 2022	\$ (8,960)

Actuarial Methods and Assumptions

The net pension liability was measured as the portion of the present value of projected benefit payments to be provided through the pension plan to current active and inactive employees that is attributed to those employees' past periods of service, less the amount of the pension plan's fiduciary

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

net position. The components of the net pension liability of the District as of December 31, 2016 are as follows:

Total Pension Liability	\$ 880,419
Plan Fiduciary Net Position	<u>(600,049)</u>
Total Net Pension Liability	<u>\$ 280,370</u>

A summary of the actuarial methods and assumptions used in determining the total net pension liability as of June 30, 2016 are as follows:

Valuation Date	June 30, 2016
Actuarial Cost Method	Entry Age Normal Cost
Actuarial Assumptions:	
Expected Remaining Service Lives	2016 – 7 years; 2015 – 7 years; 2014 – 7 years
Investment Rate of Return	7.5% per annum (net of fees)
Inflation Rate	2.875%
Salary Increases	Vary from 15% in the first two years of service to 4.75% after 25 years
Cost of Living Adjustments	Only those previously granted

The mortality rate assumption used was set based upon an experience study performed on plan data for the period July 1, 2009 through June 30, 2014. The data was then assigned credibility weighting and combined with a standard table to produce current levels of mortality. This mortality was then projected forward to a period equivalent to the estimated duration of the System's liabilities. Annuity values calculated based on this mortality were compared to those produced by using a set-back of standard tables. The result of the procedure indicated that the tables used would produce liability values approximating the appropriate generational mortality tables.

The estimated long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The long term expected nominal rate of return was 8.34% as of June 30, 2016. Best estimates of real rates of return for each major asset class included in FRS' target asset allocation as of June 30, 2016 are summarized in the following table:

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

<u>Asset Class</u>	<u>Long-Term Target Asset Allocation</u>	<u>Rates of Return</u>	
		Real	Nominal
Fixed income	24%	1.85%	
Equity	58%	6.77%	
Alternatives	8%	6.67%	
Other	<u>10%</u>	4.30%	
Totals	<u>100%</u>		5.34%
Inflation			<u>3.00%</u>
Expected Arithmetic Nominal Return			<u>8.34%</u>

The discount rate used to measure the total pension liability was 7.5%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from participating employers will be made at the actuarially determined rates approved by PRSAC taking into consideration the recommendation of the System's actuary. Based on those assumptions, the System's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity to Changes in Discount Rate

The following present the net pension liability of the participating employers calculated using the discount rate of 7.5%, as well as what the employer's net pension liability would be if it were calculated using a discount rate that is one percentage point lower, or one percentage point higher than the current rate as of June 30, 2016:

	1% Decrease <u>(6.5%)</u>	Current Discount Rate <u>(7.5%)</u>	1% Increase <u>(8.5%)</u>
Employer's proportionate share of the net pension liability	\$ <u>381,981</u>	<u>280,370</u>	<u>194,916</u>

Change in Net Pension Liability

The changes in the net pension liability for the year ended June 30, 2016 were recognized in the current reporting period except as follows:

Differences between Expected and Actual Experience

Differences between expected and actual experience with regard to economic or demographic factors in the measurement of the total pension liability were recognized in pension expense using the straight-line amortization method over a closed period equal to the average of the expected remaining service lives of all employees that are provided with pensions through the pension plan. The difference between expected and actual experience resulted in a deferred inflow of resources in the amount of \$13,393 for the year ended June 30, 2016. Pension benefit and remaining deferred inflow for the year ended June 30, 2016 was \$2,295 and \$11,098, respectively.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Notes to Financial Statements

December 31, 2016

Differences between projected and Actual Investment Earnings

Differences between projected and actual investment earnings on pension plan investments were recognized in pension expense using the straight-line amortization method over a closed five-year period. The difference between projected and actual investment earnings resulted in a deferred outflow of resources in the amount of \$84,456, for the year ended June 30, 2016. Pension benefit and remaining deferred outflow for the year ended June 30, 2016 was \$17,074 and \$67,382, respectively.

Change in Proportion

Changes in the employer's proportionate share of the collective net pension liability and collective deferred outflows of resources and deferred inflows of resources since the prior measurement date were recognized in employer's pension expense (benefit) using the straight-line amortization method over a closed period equal to the average of the expected remaining service lives of all employees that are provided pensions through the pension plan.

Contributions - Proportionate Share

Differences between contributions remitted to the System and the employer's proportionate share are recognized in pension expense (benefit) using the straight-line amortization method over a closed period equal to the average of the expected remaining service lives of all employees that are provided with a pension through the pension plan. The resulting deferred inflow/outflow and amortization is not reflected in the schedule of employer amounts due to differences that could arise between contributions reported by the System and contributions reported by the participating employer.

The System issues an annual publicly available financial report that includes financial statements and required supplementary information for the System. That report may be obtained by writing to the Firefighters' Retirement System, Post Office Box 94095, Baton Rouge, Louisiana 70804, or by calling (225) 925-4060.

(8) Risk Management

The District is exposed to various risks of loss related to workers' compensation; torts; theft of, damage to and destruction of assets; errors and omissions and natural disasters; for which the District carries commercial insurance. The premiums for group insurance are based on a fixed rate per employee. There have been no significant reductions in insurance coverage from the prior year and settled claims have not reached the level of commercial coverage in any of the past three fiscal years.

(9) Compensation of Board Member

The Board of Commissioners serves the District without compensation.

(10) Subsequent Events

The Fire District evaluated subsequent events through April 20, 2017, the date which the financial statements were available to be issued.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Board of Commissioners
St. Tammany Parish Fire Protection District No. 6
Covington, Louisiana

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities and major fund of the St. Tammany Parish Fire Protection District No. 6 (the District), as of and for the year then ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the District's basic financial statements and have issued our report thereon dated April 20, 2017.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for their purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify a deficiency in internal control, described in the accompanying schedule of findings that we consider to be a significant deficiency – 2016-1.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Response to Findings

The District's response to the findings identified in our audit is described in the accompanying schedule of findings and management corrective action plan. The District's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Governmental Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Griffin & Furman, LLC

April 20, 2017

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Schedule of Findings and Management Corrective Action Plan

December 31, 2016

Finding 2016-1:

Criteria:

Management is responsible for developing internal controls related to the preparation of financial statements as well as preparing financial statements in accordance with accounting principles generally accepted in the United States of America.

Condition & Cause:

As is common in small organizations, management has chosen to engage the auditor to propose certain year-end adjusting entries and to prepare the District's annual financial statements. This condition is intentional by management based upon the cost effectiveness of acquiring the ability to prepare financial statements in accordance with generally accepted accounting principles. Consistent with this decision, internal controls over the preparation of year-end adjusting entries and annual financial statements, complete with notes, in accordance with generally accepted accounting principles, have not been established. Under generally accepted auditing standards, this condition represents a significant deficiency in internal controls. Recently issued Statement on Auditing Standards (SAS) 115 requires that we report the above condition as a control deficiency. The SAS does not provide exceptions to reporting deficiencies that are adequately mitigated with nonaudit services rendered by the auditor or deficiencies for which the remedy would be cost prohibitive or otherwise impractical.

Recommendation:

As mentioned above, whether or not it would be cost effective to cure a control deficiency is not a factor in applying SAS 115's reporting requirements. Because prudent management requires that the potential benefit from an internal control must exceed its cost, it may not be practical to correct all the deficiencies an auditor reports under SAS 115. In this case we do not believe that curing the significant deficiency described above would be cost effective or practical and accordingly do not believe any corrective action is necessary.

Management Corrective Action Plan:

In response to the finding, management feels that it is a prudent use of funds to engage the auditor to prepare the Company's annual financial reports. We therefore agree with the auditors' recommendation that no correction action is necessary.

ST. TAMMANY PARISH FIRE PROTECTION DISTRICT NO. 6

Status of Prior Findings

December 31, 2016

Finding 2015-1:

Criteria:

Management is responsible for developing internal controls related to the preparation of financial statements as well as preparing financial statements in accordance with accounting principles generally accepted in the United States of America.

Condition & Cause:

As is common in small organizations, management has chosen to engage the auditor to propose certain year-end adjusting entries and to prepare the District's annual financial statements. This condition is intentional by management based upon the cost effectiveness of acquiring the ability to prepare financial statements in accordance with generally accepted accounting principles. Consistent with this decision, internal controls over the preparation of year-end adjusting entries and annual financial statements, complete with notes, in accordance with generally accepted accounting principles, have not been established. Under generally accepted auditing standards, this condition represents a significant deficiency in internal controls. Recently issued Statement on Auditing Standards (SAS) 115 requires that we report the above condition as a control deficiency. The SAS does not provide exceptions to reporting deficiencies that are adequately mitigated with nonaudit services rendered by the auditor or deficiencies for which the remedy would be cost prohibitive or otherwise impractical.

Recommendation:

As mentioned above, whether or not it would be cost effective to cure a control deficiency is not a factor in applying SAS 115's reporting requirements. Because prudent management requires that the potential benefit from an internal control must exceed its cost, it may not be practical to correct all the deficiencies an auditor reports under SAS 115. In this case we do not believe that curing the significant deficiency described above would be cost effective or practical and accordingly do not believe any corrective action is necessary.

Management Corrective Action Plan:

In response to the finding, management feels that it is a prudent use of funds to engage the auditor to prepare the Company's annual financial reports. We therefore agree with the auditors' recommendation that no correction action is necessary.

To the Board of Commissioners
St. Tammany Parish Fire Protection District No. 6
Covington, Louisiana

We have audited the accompanying financial statements of the governmental activities and major fund of the St. Tammany Parish Fire Protection District No. 6 (the District) as of and for the year ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the District's basic financial statements and have issued our report thereon dated April 20, 2017. In planning and performing our audit of the financial statements of the District, we considered the District's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

During our audit we noted certain matters involving internal control and other operational matters that are presented for your consideration. A separate report dated April 20, 2017, contains our report on significant deficiencies in the District's internal control. This letter does not affect our report dated April 20, 2017, on the financial statements of the District. These comments and recommendations, all of which have been discussed with the appropriate members of management, are intended to improve internal control or result in other operating efficiencies and are summarized as follows:

2016-1 Payroll

Observation: Approval of Payroll – during our review of internal controls related to payroll, we noted that the approval of timecards and manpower sheets is not explicitly documented.

Recommendation: Considering the sensitive nature of payroll, we recommend management clearly document approval of all timecards and manpower sheets so there is no question the payroll amounts have been properly approved.

Management Corrective Action Plan: The District is currently updating and revising its department's Policies and Procedures. The Financial Audit and Compliance Committee (Resolution 20172004) will address this finding and ensure that timecard and manpower sheets approval be clearly documented in the revised Policies and Procedures.

Our audit procedures are designed primarily to enable us to form an opinion on the financial statements, and therefore may not bring to light all weaknesses in policies or procedures that may exist. We aim, however, to use our knowledge of the District's organization gained during our work to make comments and suggestions that we hope will be useful to you.

We would be pleased to discuss this comment and recommendation with you at any time.

The District's response to our comment and recommendation has not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly we express no opinion on it.

This report is intended solely for the information and use of the Mayor, members of the Board of Commissioners, management, and the Louisiana Legislative Auditor and is not intended to be and should not be used by anyone other than these specified parties.

St. Tammany Parish Fire Protection District #6
Covington, Louisiana

We have performed the procedures enumerated below as they are a required part of the engagement. We are required to perform each procedure and report the results, including any exceptions. Management is required to provide a corrective action plan that addresses all exceptions noted. For any procedures that do not apply, we have marked "not applicable."

Management of the St. Tammany Parish Fire Protection District #6, is responsible for its financial records, establishing internal controls over financial reporting, and compliance with applicable laws and regulations. These procedures were agreed to by management of the District and the Legislative Auditor, State of Louisiana, solely to assist the users in assessing certain controls and in evaluating management's assertions about the District's compliance with certain laws and regulations during the period of January 1, 2016 thru December 31, 2016, in accordance with Act 774 of 2014 Regular Legislative Session.

This agreed-upon procedures engagement was performed in accordance with attestation standards established by the American Institute of Certified Public Accountants and applicable standards of *Government Auditing Standards*. The sufficiency of these procedures is solely the responsibility of the specified users of this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

Capital Assets

1. Obtain the entity's written policies and procedures over capital assets (or report that the entity does not have any written policies and procedures over capital assets) and report whether those written policies and procedures address the process for tagging assets, performing an annual inventory, and disposing of assets.

Finding: Management provided a draft of a capital assets policy that did address the process for tagging assets, performing an annual inventory, and disposing of assets. Management stated the policy will be adopted at the July 2017 Board meeting.

Corrective Action: A capital assets policy has been drafted and will be adopted at the July 2017 board meeting.

2. Report the last date on which assets were inventoried..

Finding: The last physical inventory of the Districts assets was completed on January 11, 2016.

Corrective action: The District was in a period of transition during 2016. During late 2016, the Assistant Fire Chief resigned. The Assistant Fire Chief was the individual responsible for capital assets. In May 2017, the existing Fire Chief was renamed Superintendent and a new part-time Fire Chief was hired. The new Chief has extensive experience in operating Fire Districts and the Board anticipates many operational improvements including improvements in the area of capital assets.

3. Obtain a listing of capital assets and obtain management's representation that the listing is complete. Randomly select 25 assets from the listing, locate the assets, and report whether the asset is tagged and whether information on the listing matches the location, description, manufacturer, model, and serial number of the asset.

Finding: *We obtained management's representation that the list of assets inventoried on January 11, 2016 was complete with the exception of two assets that were acquired subsequent to the prior inventory. Of the 25 assets selected for testing, none of the assets were tagged. For one asset selected, the description of the manufacturer did not match the manufacturer of the asset observed (a microwave). For one asset selected, the description of the asset did not match the asset observed (a ladder).*

Corrective action: *The District plans to perform another physical inventory of its' assets in July 2017. As part of this inventory, all applicable assets will be tagged and entered into a fixed asset tracking system. Furthermore, the District will attempt to reconcile the physical inventory to the fixed asset listing accumulated over time by the District's accountants.*

4. Randomly select 10 physical assets meeting the asset capitalization threshold, in two physical locations (if applicable). Report whether the asset is tagged, trace to the listing from #3 above for completeness, and report whether the asset is included on the listing.

Finding: *Because the physical inventory taken on January 11, 2016 only included descriptions of the assets of the District, we utilized the capital asset listing that had been accumulated over time by the District's accountants to haphazardly select 10 items that would have been capitalized. We observed all of the assets selected and none were tagged. For two of the assets selected, no similar asset could be located on the physical asset listing. The District stated these assets were obsolete and had not been inventoried during the last physical inventory (radios). For one of the assets selected, a similar asset could not be located on the physical asset listing (Hurst Extractor). We recommend the District attempt to reconcile the next physical inventory of capital assets to the listing that has been accumulated by the District's accountants over time such that the two listings are merged into one.*

Corrective action: *The District plans to perform another physical inventory of its' assets in July 2017. As part of this inventory, all applicable assets will be tagged and entered into a fixed asset tracking system. Furthermore, the District will attempt to reconcile the physical inventory to the fixed asset listing accumulated over time by the District's accountants.*

We were not engaged to perform, and did not perform, an audit, the objective of which would be the expression of an opinion on management's assertions. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the use of management of the St. Tammany Parish Fire Protection District #6 and the Legislative Auditor, State of Louisiana, and should not be used by those who have not agreed to the procedures and taken responsibility for the sufficiency of the procedures for their purposes. Under Louisiana Revised Statute 24:513, this report is distributed by the Legislative Auditor as a public document.
